Math Problem Solving in Action Nicki Newton, 2017-02-10 In this new book from popular math consultant and bestselling author Dr Nicki Newton you will learn how to help students become more effective and confident problem solvers Problem solving is a necessary skill for the 21st century but can be overwhelming for both teachers and students Dr Newton shows how to make word problems more engaging and relatable how to scaffold them and help students with math language how to implement collaborative groups for problem solving how to assess student progress and much more Topics include Incorporating problem solving throughout the math block connecting problems to students real lives and teaching students to persevere Unpacking word problems across the curriculum and making them more comprehensible to students Scaffolding word problems so that students can organize all the pieces in doable ways Helping students navigate the complex language in a word problem Showing students how to reason about model and discuss word problems Using fun mini lessons to engage students in the premise of a word problem Implementing collaborative structures such as math literature circles to engage students in problem solving Getting the whole school involved in a problem solving challenge to promote schoolwide effort and engagement and Incorporating assessment to see where students are and help them get to the next level Each chapter offers examples charts and tools that you can use immediately The book also features an action plan so that you can confidently move forward and implement the book's ideas in your own classroom Free accompanying resources are provided on the author's website www.drnickinewton.com

Teaching Mathematics in Grades 6 - 12 Randall E. Groth, 2012-08-10 A journey into the vibrant and intriguing world of mathematics education Teaching Mathematics in Grades 6 12 explores how research in mathematics education can inform teaching practice in grades 6 12 The author shows secondary mathematics teachers the value of being a researcher in the classroom by constantly experimenting with methods for developing students mathematical thinking and then connecting this research to practices that enhance students understanding of the material The chapters in Part I introduce secondary teachers to the field of mathematics education with cross cutting issues that apply to teaching and learning in all mathematics content areas The chapters in Part II are devoted to specific mathematics content strands and describe how students think about mathematical concepts The goal of the text is to have secondary math teachers gain a deeper understanding of the types of mathematical knowledge their students bring to grade 6 12 classrooms and how students thinking may develop in response to different teaching strategies

The Science Teacher's Toolbox Tara C. Dale, Mandi S.
