Prize Association for Education in Journalism and Mass Communication AEJMC Since 2000 more than 150 journalists have been killed in Mexico Today the country is one of the most dangerous in the world in which to be a reporter In *Surviving Mexico* Celeste Gonz lez de Bustamante and Jeannine E Relly examine the networks of political power business interests and organized crime that threaten and attack Mexican journalists who forge ahead despite the risks Amid the crackdown on drug cartels overall violence in Mexico has increased and journalists covering the conflict have grown more vulnerable But it is not just criminal groups that want reporters out of the way Government forces also attack journalists in order to shield corrupt authorities and the very criminals they are supposed to be fighting Meanwhile some news organizations enriched by their ties to corrupt government officials and criminal groups fail to support their employees In some cases journalists must wait for a green light to publish not from their editors but from organized crime groups Despite seemingly insurmountable constraints journalists have turned to one another and to their communities to resist pressures and create their own networks of resilience Drawing on a decade of rigorous research in Mexico Gonz lez de Bustamante and Relly explain how journalists have become their own activists and how they hold those in power accountable *The Institutional Topology of International Regime Complexes* Benjamin Daßler,2024-01-05 The Institutional Topology of International Regime Complexes Mapping Inter Institutional Structures in Global Governance provides a systematic conceptualization and explanation of the evolution of varying institutional topologies underlying regime complexes **EBOOK: Retail Marketing** ENNIS, SEAN,2015-10-16 *EBOOK Retail Marketing Electronic Governance with Emerging Technologies* Fernando Ortiz-Rodríguez,Sanju Tiwari,Patience Usoro Usip,Raul Palma,2023-09-15 This book constitutes the refereed proceedings of the Second International Conference on Electronic Governance with Emerging Technologies EGETC 2023 held in Poznan Poland during September 11 12 2023 The 15 full papers and one short paper presented were thoroughly reviewed and selected from the 76 submissions This volume focuses on the recent developments in the domain of eGovernment and governance of digital organizations also aims to shed light on the emerging research trends and their applications

Bow,Arturo Santa Cruz,2013 At the turn of the millennium Mexico seemed to have finally found its path to political and economic modernization a state which had been deeply embedded in society was being pulled out with new political leaders allowing market forces to play a greater role in guiding the nation s economic development and allowing old patron client networks to crumble At the same time many hoped that political and legal reforms would increase the state s capacity to provide prosperity security and equity for its citizens In the midst of this historic transformation however Mexico was confronted with an urgent new policy challenge Internationally recognized experts from the academic and think tank communities in the United States Mexico and Canada consider the origins of the current crisis in Mexico and the nature and effectiveness of the Calder n government s response Simply not another book on North American regional security this volume uses Joel Migdal s concept of the state in society to provide a refreshingly clear and accessible exploration of political change in the developing world The engagement with the US and Canada gives the reader a chance to observe the dynamics of persuasion across the developmental divide Four key questions structure the study What does the ongoing security crisis in Mexico tell us about the changing role of the state in society there What does the changing role of the state tell us about the nature and intractability of the crisis How has the transition to democracy affected the links between the state and organized crime in Mexico and the state s capacity to contain non state challengers What kinds of political and legal reforms are called for and what effects can we expect them to have on the extent and intensity of violence in Mexico No other study comprehensively uncovers new conceptual and theoretical insights in each of these areas whilst offering some practical guidance for policy makers and publics seeking to understand these urgent and complex challenges      *Challenging Organized Crime in the Western Hemisphere* Philip B. Heymann,Stephen P. Heymann,2018-07-03 Challenging Organized Crime in the Western Hemisphere A Game of Moves and Countermoves takes the unusual approach of exploring and describing how organized crime groups develop their capacities

in response to heightened powers of law enforcement and how law enforcement in turn responds creating an ongoing dynamic interaction The book shows how a state such as the United States has and can develop new laws and practices in ways that enable them to deal with relatively large violent groups and yet preserve the rule of law and civil liberties While most texts describe organized crime groups and the challenges to government they impose from a static perspective the authors dissect the interaction over time of organized crime and democratic governance that has created the present structure and balance of advantages in the United States Readers learn about the markets for contraband and extortionate protection that form the bulk of organized criminal enterprise the vulnerabilities of the traditional practices and rules of law enforcement the effects of globalization of criminal enterprises on their contest with the state the effectiveness of various practices of law enforcement and the continuing forces of change often technological in the businesses of organized crime and law enforcement that play important roles in the contest between them This thought provoking book is ideal for students of organized and transnational crime in university programs and law schools as well as researchers and legal practitioners who seek to look beyond the simple traditional history of organized crime and develop a strategy to confront organized crime in the future     Review of the Regulation of Freight Transport in Mexico OECD,2017-01-09 This publication identifies the main regulatory obstacles of the following transport sectors in Mexico road transport railways ports border crossing and airway passengers The report also offers recommendations to improve the quality of the regulatory framework of these sectors     *OECD Economic Surveys: Mexico 2017* OECD,2017-01-10 This 2017 OECD Economic Survey of Mexico examines recent economic developments policies and prospects The special chapters cover inclusive growth and productivity

Western Hemisphere Dept., 2014-12-01 This paper discusses Mexico's Request for Arrangement Under the Flexible Credit Line FCL and Cancellation of the Current Arrangement Mexico's macroeconomic policies and policy frameworks remain very strong Real GDP growth is projected to accelerate to 3.5 percent in 2015 The authorities are requesting a new FCL arrangement for two years at the same level of access In their view the risk of a rapid rebalancing of investor portfolios away from emerging markets remains elevated The IMF staff considers the proposed access level of SDR 47.292 billion to be appropriate Uncertainties surrounding the global outlook including risks related to the tightening of monetary policy in the United States remain high

Citizen Support for Democratic and Autocratic Regimes Marlene Mauk, 2020-04-30 Citizen Support for Democratic and Autocratic Regimes takes a political culture perspective on the struggle between democracy and autocracy by examining how these regimes fare in the eyes of their citizens Taking a globally comparative approach it studies both the levels as well as the individual and system level sources of political support in democracies and autocracies worldwide The book develops an explanatory model of regime support which includes both individual and system level determinants and specifies not only the general causal mechanisms and pathways through which these determinants affect regime support but also spells out how these effects might vary between the two types of regimes It empirically tests its propositions using multi

level structural equation modeling and a comprehensive dataset that combines recent public opinion data from six cross national survey projects with aggregate data from various sources for more than 100 democracies and autocracies It finds that both the levels and individual level sources of regime support are the same in democracies and autocracies but that the way in which system level context factors affect regime support differs between the two types of regimes The results enhance our understanding of what determines citizen support for fundamentally different regimes help assessing the present and future stability of democracies and autocracies and provide clear policy implications to those interested in strengthening support for democracy and or fostering democratic change in autocracies Comparative Politics is a series for researchers teachers and students of political science that deals with contemporary government and politics Global in scope books in the series are characterised by a stress on comparative analysis and strong methodological rigour The series is published in association with the European Consortium for Political Research For more information visit [www.ecprnet.eu](http://www.ecprnet.eu) The series is edited by Susan Scarrow Chair of the Department of Political Science University of Houston and Jonathan Slapin Professor Department of Political Science University of Zurich

### **Democratization and Memories of Violence** Mneesha

Gellman,2016-08-05 Ethnic minority communities make claims for cultural rights from states in different ways depending on how governments include them in policies and practices of accommodation or assimilation However institutional explanations don t tell the whole story as individuals and communities also protest using emotionally compelling narratives about past wrongs to justify their claims for new rights protections Democratization and Memories of Violence Ethnic minority rights movements in Mexico Turkey and El Salvador examines how ethnic minority communities use memories of state and paramilitary violence to shame states into cooperating with minority cultural agendas such as the right to mother tongue education Shaming and claiming is a social movement tactic that binds historic violence to contemporary citizenship Combining theory with empirics the book accounts for how democratization shapes citizen experiences of interest representation and how memorialization processes challenge state regimes of forgetting at local state and international levels Democratization and Memories of Violence draws on six case studies in Mexico Turkey and El Salvador to show how memory based narratives serve as emotionally salient leverage for marginalized communities to facilitate state consideration of minority rights agendas This book will be of interest to postgraduates and researchers in comparative politics development studies sociology international studies peace and conflict studies and area studies
