money off the backs of illegal aliens refugees and low wage guest workers Politicians want cheap votes or cheap labor Church leaders want pew fillers and collection plate donors Social justice militants working with corporate America want to silence free speech they deem hateful while raking in tens of millions of dollars promoting mass uncontrolled immigration both legal and illegal Malkin names names from Pope Francis to George Clooney from George Soros to the Koch brothers from Jack Dorsey to Tim Cook and Mark Zuckerberg Enlightening as it is infuriating Open Borders Inc reveals the powerful forces working to erase America *Congressional Record* United States. and most secretive charitable organization from public scrutiny The Bill Gates Problem shows how Gates's billions have purchased a stunning level of control over public policy private markets scientific research and the news media Whether he is pushing new educational standards in America health reforms in India global vaccine policy during the pandemic or Western industrialized agriculture throughout Africa Gates's heady social experimentation has shown itself to be not only undemocratic but also ineffective In many places Bill Gates is hurting the very people he intends to help No less than dark money campaign contributions or big business political lobbying Bill Gates's philanthropic empire needs to be seen as a problem of money in politics It is a dangerous model of unconstrained power that threatens democracy and demands our attention

The Transformation of Foreign Policy Gunther Hellmann, Andreas Fahrmeir, Miloš Vec, 2016-07-14 The study of foreign policy is usually concerned with the interaction of states and thus with governance structures which emerged either with the so called Westphalian system or in the course of the 18th century diplomacy and international law As a result examining foreign policy in earlier periods involves conceptual and terminological difficulties which echo current debates on post national foreign policy actors like the European Union or global cities This volume argues that a novel understanding of what constitutes foreign policy may offer a way out of this problem It considers foreign policy as the outcome of processes that make some boundaries different from others and set those that separate communities in an internal space apart from those that mark foreignness The creation of such boundaries which can be observed at all times designates specific actors which can be but do not have to be states as capable of engaging in foreign policy As such boundaries are likely to be contested they are unlikely to provide either a single or a simple distinction between insides and outsides In this view multiple layers of foreign policy actors with different characteristics appear less as a modern development and more as a perennial aspect of foreign policy In a broad perspective stretching from early Greek polities to present day global cities the volume offers a theoretical and empirical presentation of this concept by political scientists jurists and historians
