Metropolitan Governance in the Federalist

Americas Peter Spink, Peter M. Ward, Robert Hines Wilson, 2012 Despite rapid metropolitanization throughout the Americas and widespread interest in megacities few studies have examined the new governance structures needed to address issues of citizen representation and participation and the public service challenges of population expansion and increasing urban inequalities To fill that void Peter K Spink Peter M Ward Robert H Wilson and the other contributors to this volume provide original research and analysis of the principal metropolitan areas in six federalist countries of the Americas Argentina Brazil Canada Mexico the United States and Venezuela They find that a common feature of metropolitan expansion is the lack of a unified governmental structure Using a comparative research framework they examine the forms functions legitimacy and performance of emerging governmental structures Their cross national study shows that existing institutional structures and political systems impede collaboration among governments in metropolitan areas Given both the relatively few successful models at the local level and the disinterest on the part of federal governments regional governments states and provinces seem to provide the most pragmatic bases for constructing metropolitan governments that are capable of efficiently delivering services Because there is no direct path to achieve such new structures the authors urge reform at the state and local levels to address the need to work out the politics and management structures that will function best within their own politics Metropolitan Governance in the Federalist Americas makes an important contribution to the broader debate on subnational governance and to the specific debate on metropolitan governance The authors provide an excellent accessible description and explanation of the wide variation in forms rules and outcomes associated with metropolitan governance in the Americas A significant and useful feature of the volume is the authors inclusion of case studies they allow the reader to think productively about political history economics and the sociocultural context Brian Wampler Boise State University

Metropolitan America Bernard J. Frieden,1966 *Community, Scale, and Regional Governance* Liesbet Hooghe,Gary Marks,2016-08-18 This is the second of five ambitious volumes theorizing the structure of governance above and below the central state This book is written for those interested in the character causes and consequences of governance within the state The book argues that jurisdictional design is shaped by the functional pressures that arise from the logic of scale in providing public goods and by the preferences that people have regarding self government The first has to do with the character of the public

goods provided by government their scale economies externalities and informational asymmetries The second has to do with how people conceive and construct the groups to which they feel themselves belonging In this book the authors demonstrate that scale and community are principles that can help explain some basic features of governance including the growth of multiple tiers over the past six decades how jurisdictions are designed why governance within the state has become differentiated and the extent to which regions exert authority The authors propose a postfunctionalist theory which rejects the notion that form follows function and argue that whilst functional pressures are enduring one must engage human passions regarding self rule to explain variation in the structures of rule over time and around the world Transformations in Governance is a major new academic book series from Oxford University Press It is designed to accommodate the impressive growth of research in comparative politics international relations public policy federalism environmental and urban studies concerned with the dispersion of authority from central states up to supranational institutions down to subnational governments and side ways to public private networks It brings together work that significantly advances our understanding of the organization causes and consequences of multilevel and complex governance The series is selective containing annually a small number of books of exceptionally high quality by leading and emerging scholars The series targets mainly single authored or co authored work but it is pluralistic in terms of disciplinary specialization research design method and geographical scope Case studies as well as comparative studies historical as well as contemporary studies and studies with a national regional or international focus are all central to its aims Authors use qualitative quantitative formal modeling or mixed methods A trade mark of the books is that they combine scholarly rigour with readable prose and an attractive production style The series is edited by Liesbet Hooghe and Gary Marks of the University of North Carolina Chapel Hill and the VU Amsterdam and Walter Mattli of the University of Oxford
