Aron,Paul Todhunter,2009 This revised and updated edition of Rudolf Geiger s classic text provides a clear and vivid description of the surface microclimate its physical basis and its interactions with the biosphere The book explains the principles of microclimatology and illustrates how they apply to a wide array of subfields Those new to the field will find it especially valuable as a guide to understanding and quantifying the vast and ever increasing literature on the subject Designed as an introductory text for students in environmental science this book will also be an essential reference for scientists seeking a clear understanding of the nature and physical basis of the climate near the ground and its interactions with the biosphere *Forest Canopies* Margaret D. Lowman,H. Bruce Rinker,2004-09-28 The treetops of the world s forests are where discovery and opportunity abound however they have been relatively inaccessible until recently This book represents an authoritative synthesis of data anecdotes case studies observations and recommendations from researchers and educators who have risked life and limb in their advocacy of the High Frontier With innovative rope techniques cranes walkways dirigibles and towers they finally gained access to the rich biodiversity that lives far above the forest floor and the emerging science of canopy ecology In this new edition of *Forest Canopies* nearly 60 scientists and educators from around the world look at the biodiversity ecology evolution and conservation of forest canopy ecosystems Comprehensive literature list State of the art results and data sets from current field work Foremost scientists in the field of canopy ecology Expanded collaboration of researchers and international projects User friendly format with sidebars and case studies Keywords and outlines for each chapter North American Droughts Norman J. Rosenberg,2019-03-08 Recognizing drought as a characteristic feature of the North American climate the contributors to this volume seek to organize available evidence of both prehistoric and modern drought events and to provide information on the severity of droughts especially those which have occurred since weather records have been kept The impacts of modern era droughts on production and the potential

impact of future droughts on the productivity of North American agriculture are examined The authors explore the effects of past droughts on the social cultural and political life of the population the possible effects of drought on today's energy and technology intensive society and the ramifications of drought for the national economy The social and political strategies that local state and federal governments may use to ameliorate the effects of drought are also considered as are some possible technological defenses against drought weather modification expanded irrigation new techniques of water harvesting and storage and new agronomic adaptations Finally the critical question of whether future droughts can be forecast is examined

**Advances in Insect Physiology**, 1982-07-06 *Advances in Insect Physiology* *Recent Advances in the Modeling of Hydrologic Systems* D.S Bowles, P. Enda O'Connell, 2012-12-06 Modeling of the rainfall runoff process is of both scientific and practical significance Many of the currently used mathematical models of hydrologic systems were developed a generation ago Much of the effort since then has focused on refining these models rather than on developing new models based on improved scientific understanding In the past few years however a renewed effort has been made to improve both our fundamental understanding of hydrologic processes and to exploit technological advances in computing and remote sensing It is against this background that the NATO Advanced Study Institute on Recent Advances in the Modeling of Hydrologic Systems was organized The idea for holding a NATO ASI on this topic grew out of an informal discussion between one of the co-directors and Professor Francisco Nunes Correia at a previous NATO ASI held at Tucson Arizona in 1985 The Special Program Panel on Global Transport Mechanisms in the Geo Sciences of the NATO Scientific Affairs Division agreed to sponsor the ASI and an organizing committee was formed The committee comprised the co-directors Professor David S Bowles U S A and Professor P Enda O'Connell U K and Professor Francisco Nunes Correia Portugal Dr Donn G DeCoursey U S A and Professor Ezio Todini Italy Field Manual of Techniques in Invertebrate Pathology Lawrence A. Lacey, Harry K. Kaya, 2013-06-29 The 38 chapters of this Field Manual provide the tools required for planning experiments with entomopathogens and their implementation in the field Basic tools include chapters on the theory and practice of microbial control agents statistical design of experiments equipment and application strategies The major pathogen groups are covered in individual chapters virus bacteria protozoa fungi nematodes Subsequent chapters deal with the impact of naturally occurring and introduced exotic pathogens and inundative application of microbial control agents The largest section of the Manual is composed of 21 chapters on the application and evaluation of entomopathogens in a wide range of agricultural forest domestic and aquatic habitats Mites and slugs broaden the scope of the book Supplementary techniques and media for follow up laboratory studies are described Three final chapters cover the evaluation of Bt transgenic plants resistance to insect pathogens and strategies to manage it and guidelines for evaluating the effects of MCAs on nontarget organisms Readership Researchers graduate students practitioners of integrated pest management regulators those doing environmental impact studies The book is a stand alone reference but is also complementary to the laboratory oriented
