Authentic Academic Leadership Jeffrey L. Buller, 2018-02-23 The book explores how to build an approach to academic leadership based on your own personal values, convictions, and principles. Rather than trying to assert that only certain values or even virtues are essential for good leadership, the approach taken is to begin with who you really are, your true self, and then to build a leadership framework consistent with that identity that makes your institution or program stronger. We explore why hypocrisy is damaging to any form of leadership but particularly so in higher education where values of scholarship and research are based on the confidence we have in others' integrity. As a result, authenticity, even more than such commonly promoted traits of leaders as vision, courage, and compassion, becomes the core of effective leadership in the academy today. Through hypothetical case studies and thought experiments, the book challenges administrators to identify a small set of core values that truly define who they are as academic leaders and then to use those values as the basis for a philosophy of leadership that guides them through the turbulent changes occurring in higher education today.

Managing Time and Stress Jeffrey L. Buller, 2018-09-30 The book provides a concise guide to how academic leaders can manage their time more efficiently and thus better cope with the stresses of their position. Rather than focusing on theory or the causes of time and stress pressures for college administrators today, the book focuses on field-tested approaches for achieving more of one's priorities and for dealing with the pressures of academic leadership positions. Academic leaders already know why they're running short of time and feeling stressed; they don't want more analysis and theory but rather insights into how they can make things better. The book is designed for use by individual academic leaders, administrative teams, in a retreat, leadership workshops, or training programs and courses in higher education leadership.

Hire the Right Faculty Member Every Time Jeffrey L. Buller, 2017-06-22 *Hire The Right Faculty Member Every Time* is a concise guide for hiring authorities at colleges and universities. Evaluating Boards and Administrators Jeffrey L. Buller, 2020-11-01 Accrediting agencies and legislatures have become increasingly insistent that governing boards and upper administrators undergo regular evaluation at colleges and universities Institutions of higher education have a long history of evaluating faculty members and are familiar with best practices for doing so Offices of human resources include employees with experience in how staff members should be evaluated because these processes are well developed in the corporate world But how does a college or university effectively evaluate its governing board and who performs that process How are administrators particularly the chief executive officer and vice presidents evaluated fairly and effectively Since a majority of institutions are now required to perform these evaluations they are seeking advice and examples of best practices but there are not resources available to provide these insights This book will address that critical need The target audience is college faculty and administrators particularly those who need to develop or improve a system for evaluating governing boards or administrators because of accreditation requirements or legislative mandate

Best Practices for Faculty Search Committees Jeffrey L. Buller, 2017-01-24 The essential guidebook for effective faculty hiring committees Best Practices for Faculty Search Committees presents a clear direct action plan for faculty and administration involved in hiring Written by a veteran university administrator this book lays out a step by step process for selecting the right candidate for the job Practical guidance on application review interviewing and evaluation walks you through established and effective methods while case studies and examples from a variety of institutions provide insight into real world implementation Whether you re serving on a faculty search committee for the first time or simply seeking a more efficient route to the best candidate this book provides invaluable guidance that can streamline the search and selection process Tenure track and long term opportunities don t come about every day so it s essential for hiring committees to make the correct choice While the search process may be codified to an extent by your institution there is still plenty of room for error or misjudgment this book helps you keep the process on track and moving forward until the best candidate is identified Develop criteria for efficient and informative application review Conduct in depth interviews that provide a clear picture of fit Evaluate final candidates on the most pertinent points for the job Most faculty search resources are technical in nature with little guidance on getting the job done properly and efficiently best practices tend to be unwritten and frequently verge into habit rather than critically evaluated method Best Practices for Faculty Search Committees provides clear concise concrete guidance for a more efficient effective and successful candidate search

Free Speech and Campus Civility Jeffrey L. Buller, Robert E. Cipriano, 2021-06-01 Many colleges and universities are struggling to strike a balance between protecting free speech as a way of supporting their goal of academic freedom and promoting civility as a way of creating an environment where students can learn and faculty members can teach and conduct research There have been numerous recent incidents of audiences shouting down speakers burning books and demanding that specific students be expelled or faculty members be terminated In this highly fractious environment schools are wondering What works when seeking to attain the twin goals of permitting unrestricted speech but insisting on rules of decorum for debate and the exchange of perspectives This book explores what schools have actually attempted in some cases successfully and in some cases not successfully to address these issues It concludes that there are three primary strategies that tend to be effective treating challenges to free speech and campus civility as teachable moments exploring hypothetical scenarios with students faculty members and administrators before there is a serious incident and approaching free speech and campus civility across the curriculum The book also surveys United States case law on the topics of free speech academic freedom the right to protest and similar subjects so as to provide faculty members and administrators with a concise resource filled with practical and accurate information

Buller, 2021-10-15 Faculty recruitment is a major expense for colleges and universities and schools devote a considerable amount of their resources to the hiring process But many of these institutions fail to devote the same attention to retaining college professors We've learned through many studies that it's far less expensive to retain a student you have than to recruit a new one Why is this lesson not also applied to the college faculty This book addresses why higher education currently has a faculty retention problem and then explores the strategies needed to address that problem But now all faculty members are alike Minority faculty members have their own retention challenges as do highly competitive researchers part time and temporary faculty members who excel at teaching and other key groups The best ways to retain the junior faculty are not necessarily the best ways to retain mid career and senior faculty By examining best practices currently in place in higher education and then combining those insights with research conducted in the corporate world the book encourages colleges and universities to develop a culture of retention that applies to students and faculty members alike **The Essential Academic Dean or Provost** Jeffrey L.
