**Valuable Flints** Bjørn I. Smit, 2010 This book addresses the problems concerning the research of Stone Age surface scatters in the Northern Netherlands provinces of Groningen Drenthe and Friesland Research methods are presented which can be used to assess these scatters within the realm of archaeological heritage management and suggestions are made with regard to knowledge hiatus and future research opportunities Due to the large number of scatters poor conservation lack of visibility in the landscape and disturbed context these sites can often be overlooked Nowadays the majority of archaeological research is performed within the context of archaeological heritage management where besides scientific socio economic motives also play a role A major part of this book is focused on ways in which these scatters can be investigated within the context of archaeological heritage management In this thesis the use of a landscape approach is advocated for an effective study of early prehistoric communities This means that the intrinsic characteristics of the surface scatters should be supplemented with information on landforms and palaeo ecological data from the surrounding areas By using such an approach a more thorough image of Stone Age communities can be presented A Mind Set on Flint M. J. L. Th Niekus, Nicholas Barton, Martin Street, Thomas Terberger, 2012 This volume comprises papers presented to Dick Stapert on the occasion of his retirement from the Groningen Institute of Archaeology University of Groningen in 2011 and celebrates his scientific career The contributions cover nearly 300 000 years of Human History and were written by colleagues former students and friends Topics include the making and use of fire children in the Stone Age spatial analysis and other themes related to the study of the Palaeolithic Mesolithic and beyond Proceedings of the Prehistoric Society Prehistoric Society (London, England), 1936 **A Living Landscape** Stijn Arnoldussen, 2008 Today half the Netherlands is below sea level Because of this water management is of key importance when it comes to maintaining present day habitation of the Dutch low lands In prehistory however large parts of the Dutch landscape were highly dynamic due to ongoing fluvial sedimentation Vast deltaic areas with ceaseless river activity formed the backdrop against which prehistoric occupation took place Although such landscapes may seem inhospitable the often excellently preserved archaeological evidence indicates that people lived in these lowlands throughout prehistory This book describes why Bronze Age farmers were keen to settle here and how these prehistoric communities structured the landscape around their house sites at various scales Using a vast body of evidence from several large scale excavations in the Dutch river area the author reconstructs the changes in the cultural landscape over time Starting from the Middle Neolithic changing preferences for settlement site locations and changes in domestic architecture are traced in detail to the Iron Age However for proper understanding of the cultural landscape not only settlements but also graves and patterns of object deposition and their landscape characteristics are discussed By using evidence from over 50 major excavations yielding over 300 house plans this book contains by far the richest data set on Dutch Bronze Age settlements Most of these results have not previously been published in English making this book of over 500 pages a true academic treasure for an international audience The in depth presentation of Bronze Age settlement sites as

well as the critical discussion of models and premises current in later prehistoric settlement archaeology have an important relevance stretching beyond the Dutch lowland areas on which it is based The wealth of high quality Dutch data is presented as a synthesized yet well annotated narrative that rises above mere site interpretation even more so due to its landscape scale focus Therefore this book is a must have for those interested in later prehistoric cultural landscapes and settlement archaeology *Basic Concepts for Simple and Complex Liquids* Jean-Louis Barrat, Jean-Pierre Hansen, 2003-03-27 Presenting a unified approach this book focusses on the concepts and theoretical methods that are necessary for an understanding of the physics and chemistry of the fluid state The authors do not attempt to cover the whole field in an encyclopedic manner Instead important ideas are presented in a concise and rigorous style and illustrated with examples from both simple molecular liquids and more complex soft condensed matter systems such as polymers colloids and liquid crystals **Palaeohistoria**, 2005 De Zuiderzee als transportlandschap W.B. Waldus, 2022-02-05 Binnenvaart over de Zuiderzee is zeer belangrijk geweest voor de spectaculaire groei van de vroegmoderne Nederlandse economie 1550 1700 Dat concludeert promovendus Wouter Waldus Hij heeft voor zijn promotie de vloot van de turfschipperij op de Zuiderzee goed onderbouwd berekend en vergeleken met andere sectoren Daarnaast heeft hij de Zuiderzee als maritiem transportlandschap volledig in kaart gebracht vaarroutes markeringen redes etc Zo kon hij het unieke karakter van het binnenvaartnetwerk duidelijk maken Waldus vond tijdens zijn onderzoek ook aanwijzingen voor gezinsbewoning aan boord van binnenschepen rond 1650 veel vroeger dan tot nu toe werd aangenomen *Megalithic Research in the Netherlands, 1547-1911* Jan Albert Bakker, 2010 In the Introduction a brief general review is given of the present knowledge and ideas about the Hunebed Builders who lived some 5000 years ago during the Stone Age Migrant Labour in Europe, 1600-1900 Jan Lucassen, 2022-11-16 Migrant Labour in Europe 1987 examines the movement of workers from less prosperous parts of Europe to areas with demand for their services The author identifies seven major systems of migrant labour the North Sea System mainly Westphalian workers heading for the German and Dutch North Sea Coast and Walloon French workers bound for the Belgian and Zeeland coasts the area between London and the Humber the Paris Basin Provence Languedoc and Catalonia Castile Piedmont and central Italy with Corsica A detailed study of the first of these systems tracing its development and changes is brought into a synchronic relation with data for the other regions The evidence shows major waves of immigration in the seventeenth century and a rapid diminution of migratory labour to the North Sea in the last quarter of the nineteenth century a time when new pull areas were created by the expanding industrial complexes of Germany and labour began to come in from areas outside Europe Europe's Early Fieldscapes Stijn Arnoldussen, Robert Johnston, Mette Løvschal, 2021-10-05 This volume focuses on the development of field systems through time and space and in their wider landscape context including classical issues pertaining to past land use and management regimes including manuring water land and crop management and technologies such as slash and burn cultivation and use of the ard and
