John Muir (1838-1914), often referred to as the Father of the National Parks, founded the Sierra Club and played a pivotal role in the establishment of numerous national parks, including Yosemite. His experiences as a wanderer and naturalist profoundly influenced his writings, revealing an intimate relationship with nature that underscored the urgency of environmental preservation, a theme that echoes throughout his works. **Nature's Mountain Mansion** Gary Noy, 2022-11. *Nature's Mountain Mansion* is the first anthology on Yosemite that focuses exclusively on the nineteenth century, the critical period in which Yosemite was discovered by an expanding nation and transformed into one of the country's most visited national parks. While there are volumes that provide readings about Yosemite in the nineteenth century, few provide critical, sometimes even disparaging, eyewitness reflections on the Yosemite experience, and none include excerpts from the government documents that defined the future of the park, such as the Yosemite Valley Grant Act of 1864. This anthology collects selections from fiction, nonfiction, and government documents that demonstrate the glory, the brutality, and the controversies surrounding this extraordinary and much-loved landscape. Some selections have not appeared in print since their original publication, while others have not been republished or excerpted for decades.
