

FT-Raman module

The FT-Raman module must be installed on the right side of a Nicolet FT-IR spectrometer. No other modules can be installed on the right side of the FT-Raman module. Your work space must be wide enough to accommodate the spectrometer, the FT-Raman module and any other modules that are installed on the left side of the spectrometer.

Important

The excitation laser and electronics are air-cooled by two fans, one located in the FT-Raman module rear panel and one located in the bottom of the accessory. To avoid overheating of the instrument, do not block the free flow of air into or out of the rear panel or the flow of air under the accessory. There should be at least 15 cm (6 in) of clearance behind the accessory.

If the FT-Raman module is equipped with a standard InGaAs (Indium-Gallium Arsenide) detector, it weighs about 45 kg (100 lb). It is 61 cm (24 in) wide by 71 cm (28 in) deep by 33 cm (13 in) high.

engineering issues or wishing to deal with equally important scientific problems *Bioinorganic Chemistry of Nickel*
Michael J. Maroney, Stefano Ciurli, 2020-06-16 The chemistry of nickel in biological systems has been intensely investigated since the discovery of the essential role played by this transition metal in the enzyme urease ca 1975 Since then several nickel dependent enzymes have been discovered and characterized at the molecular level using structural spectroscopic and kinetic methods and insight into reaction mechanisms has been elaborated using synthetic and computational models The dual role of nickel as both an essential nutrient and as a toxin has prompted efforts to understand the molecular mechanisms of nickel toxicology and to uncover the means by which cells select nickel from among a pool of different and more readily available metal ions and thus regulate the intracellular chemistry of nickel This latter effort highlights the importance of proteins involved in the extra and intra cellular sensing of nickel the roles of nickel selective proteins for import and export and nickel responsive transcription factors all of which are important for regulating nickel homeostasis In this Special Issue the contributing authors have covered recent advances in many of these aspects of nickel biochemistry including toxicology bacterial pathogenesis carcinogenesis computational and synthetic models nickel trafficking proteins and enzymology

Spectroscopic Techniques For Semiconductor Industry Vladimir Protopopov, 2022-10-21 The unique compendium presents special principles and techniques of spectroscopic measurements that are used in semiconductor manufacturing Since industrial applications of spectroscopy are significantly different from those traditionally used in scientific laboratories the design concepts and characteristics of industrial spectroscopic devices may vary significantly from conventional systems These peculiarities are thus succinctly summarized in this volume for a wide audience of students engineers and scientific workers Exceptionally well illustrated with practical solutions in detail this useful reference text will open new horizons in new research areas

Silicon-Based Nanomaterials Robert W. Kelsall, 2019-06-18 Silicon has been proven to be remarkably resilient as a commercial electronic material The microelectronics industry has harnessed nanotechnology to continually push the performance limits of silicon devices and integrated circuits Rather than shrinking its market share silicon is displacing competitor semiconductors in domains such as high frequency electronics and integrated

photonics There are strong business drivers underlying these trends however an important contribution is also being made by research groups worldwide who are developing new configurations designs and applications of silicon based nanoscale and nanostructured materials This Special Issue features a selection of papers which illustrate recent advances in the preparation of chemically or physically engineered silicon based nanostructures and their application in electronic photonic and mechanical systems
