**Understanding Securitisation Theory** Thierry Balzacq, 2010-09-13 This volume aims to provide a new framework for the analysis of securitization processes increasing our understanding of how security issues emerge evolve and dissolve Securitisation theory has become one of the key components of security studies and IR courses in recent years and this book represents the first attempt to provide an integrated and rigorous overview of securitization practices within a coherent framework To do so it organizes securitization around three core assumptions which make the theory applicable to empirical studies the centrality of audience the co dependency of agency and context and the structuring force of the dispositif These assumptions are then investigated through discourse analysis process tracing ethnographic research and content analysis and discussed in relation to extensive case studies This innovative new book will be of much interest to students of securitisation and critical security studies as well as IR theory and sociology Thierry Balzacq is holder of the Tocqueville Chair on Security Policies and Professor at the University of Namur He is Research Director at the University of Louvain and Associate Researcher at the Centre for European Studies at Sciences Po Paris **Critical Security and Chinese Politics** Juha A. Vuori, 2014-10-24 This book examines how critical approaches to security developed in Europe can be used to investigate a Chinese security issue the case of the Falungong The past few decades have produced a rich field of theoretical

approaches to security in Europe In this book the security specific notions of securitization the politics of insecurity and emancipation are used as analytical approaches to investigate the anti Falungong campaign in the People s Republic of China This campaign launched in 1999 was the largest security related propaganda campaign since 1989 and was directed against a group of qigong practitioners who were presented as a grave threat to society The campaign had major impacts as new security legislation was established and human rights organizations reported severe mistreatment of practitioners This book approaches one empirical case with three approaches in order to transcend the tendency to pit one approach against another It shows how they highlight different aspects in investigation and how they can be combined to gain more comprehensive insights and thereby invigorate renewed debate in the field Furthermore this is used as a vehicle to discuss more general philosophical issues of theory development and theory development and will assist students to comprehend the effects research framework selection has on a piece of research Such discussions are necessary in order to apply the frameworks in investigations that go beyond the socio political context they were originally developed in This book will be of interest to students of critical security studies Chinese politics research methods and IR in general Chinese Religiosities Mayfair Mei-hui Yang,2008-11-04 Extraordinarily timely and useful As China emerges as an economic and political world power that seems to have done away with religion in fact it is witnessing a religious revival The thoughtful essays in this book show both the historical conflicts between state authorities and religious movements and the contemporary encounters that are shaping China s future I am aware of no other book that covers so much ground and can be used so well as an introduction to this important field Peter van der Veer University of Utrecht **Radicalisation** James R. Lewis,Akil N. Subcommittee on Oversight and Investigations,2006 The advocacy trap Stephen Noakes,2017-12-27 What does China s rise mean for transnational civil society What happens when global activist networks engage a powerful and norm resistant new hegemon This book combines detailed ethnographic research with cross case comparisons to identify key factors underpinning variation in the results and processes of advocacy on a range of issues affecting both China and the world including global warming intellectual property rights HIV AIDS treatment the use of capital punishment suppression of the Falun Gong religious movement and Tibetan independence Built on a unique blend of comparative and international theory it advances the notion of advocacy drift a process whereby the objectives and principled beliefs of activists are transformed through interaction with the Chinese state The book offers a timely reassessment of transnational civil society including its power to persuade and to leverage the policies of national governments
