exotics related organizations and a reference section round out the text. Photographs of each species make the book both attractive and useful as a field tool. In a chapter on photographing exotics Christian Mungall shows readers how to take their own great pictures of these animals. Clearly as James G Teer of the Department of Wildlife and Fisheries Sciences at Texas A M University states this is much more than a field guide. Elizabeth Cary Mungall's book is a long awaited repository and data source on the ecology technology and management of more than 80 species of non native hoofed animals. Anyone with exotics on his or her property will require Exotic Animal Field Guide.
