Our Common Wealth The Hidden Economy That Makes Everything Else Work:

Our Common Wealth Jonathan Rowe, 2013-04 The Commons is a generic term that denotes everything we share The commons includes our entire life support system both natural and social The air and oceans the web of species wilderness and flowing water all are parts of the commons So too are language and knowledge sidewalks and public squares the stories of childhood the processes of democracy Some parts of the commons are gifts of nature others the product of human creativity and endeavor Some are new such as the Internet others are as ancient as soil and calligraphy But they all belong to all of us if that is the word No one has exclusive rights We inherit them jointly and hold them in trust for those who come after us This short but comprehensive work examines the history and tragic loss of the commons and discusses how we can bring them back at a time when privatization and ownership are economic mantras By examining institutions communities and educational systems as well as the ways in which communities and even nations are governed the authors make a plea for a more sustainable healthier and socially beneficial future for all by establishing and thriving in the commons

Our Common Wealth Jonathan Rowe, 2013-04-01 A huge part of our economy is invisible invaluable and under siege The commons is a term that denotes everything we share as opposed to own privately Some parts of the commons are gifts of nature the air and oceans the web of species wilderness and watersheds Others are the product of human creativity and endeavor sidewalks and public squares the Internet our languages cultures technologies and infrastructure In graceful and down to earth prose Jonathan Rowe illuminates the scale and value of the commons its symbiotic relationship with the rest of the economy its importance to our personal and planetary well being and how it is threatened by privatization and neglect Rowe also describes a growing movement to recognize and defend the commons on many fronts community initiatives legal actions and visionary proposals such as a sky trust to charge polluters and distribute the proceeds to all of us Simple gestures can be powerful too Rowe relates how he set some benches in a vacant lot and watched a public gathering space take shape For decades people have defended the commons and not known it They've battled pollution development corporate marketing assaults on their kids and many other attacks on common wealth What's been missing is a story that unifies all these seemingly unrelated battles with the force of a powerful idea This is what Jonathan Rowe provides in this thought provoking book It's not too much to say that our future as a species requires grasping the ideas in this book from the foreword by Bill McKibben author of *The End of Nature*

Our Common Wealth Jonathan Rowe, 2013-04 A huge part of our economy is invisible invaluable and under siege The commons is a term that denotes everything we share as opposed to own privately Some parts of the commons are gifts of nature the air and oceans the web of species wilderness and watersheds Others are the product of human creativity and endeavor sidewalks and public squares the Internet our languages cultures technologies and infrastructure In graceful and down to earth prose Jonathan Rowe illuminates the scale and value of the commons its symbiotic relationship with the rest of the economy its importance to our personal and planetary well being and how it is

threatened by privatization and neglect Rowe also describes a growing movement to recognize and defend the commons on many fronts community initiatives legal actions and visionary proposals such as a sky trust to charge polluters and distribute the proceeds to all of us Simple gestures can be powerful too Rowe relates how he set some benches in a vacant lot and watched a public gathering space take shape For decades people have defended the commons and not known it They've battled pollution development corporate marketing assaults on their kids and many other attacks on common wealth What's been missing is a story that unifies all these seemingly unrelated battles with the force of a powerful idea This is what Jonathan Rowe provides in this thought provoking book It's not too much to say that our future as a species requires grasping the ideas in this book from the foreword by Bill McKibben author of *The End of Nature* *Born on Third Base* Chuck Collins, 2016-09-23 A call to action for America's wealthy and a warning shot across the bows of their yachts if they fail to act *Born on Third Base* offers a clear and compelling case for why the privileged and powerful must act to reverse widening inequality of income wealth and political power in America Robert B Reich former US Secretary of Labor author of *Saving Capitalism* An essential piece of reading for anyone concerned by the increasing wealth inequality made worse by the global pandemic and political partisanship The growing wealth inequality continues to dominate headlines The divide between the haves and have nots in America is increasingly political and tensions are rising On one side the wealthy wield power and advantage keeping the system operating in their favor all while retreating into enclaves that separate them further and further from the poor and working class On the other side those who find it increasingly difficult to keep up or get ahead are desperate and frustrated waging a rhetorical war against the rich and letting anger and resentment keep us from seeing new potential solutions But can we suspend both class wars long enough to consider a new way forward Is it really good for anyone that most of society's wealth is pooling at the very top of the wealth ladder Does anyone including the one percent really want to live in a society plagued by economic apartheid It is time to think differently says longtime inequality expert and activist Chuck Collins Born into the one percent Collins gave away his inheritance at 26 and spent the next three decades mobilizing against inequality He uses his perspective from both sides of the divide to deliver a new narrative Collins calls for a ceasefire and invites the wealthy to come back home investing themselves and their wealth in struggling communities And he asks the non wealthy to build alliances with the one percent and others at the top of the wealth ladder Stories told along the way explore the roots of advantage show how taxpayers subsidize the wealthy and reveal how charity used incorrectly can actually reinforce extreme inequality Readers meet pioneers who are crossing the divide to work together in new ways including residents in the author's own Boston area neighborhood who have launched some of the most interesting community transition efforts in the nation In the end Collins's national and local solutions not only challenge inequality but also respond to climate change and offer an unexpected fresh take on one of our most intransigent problems *Activating the Common Good* Peter Block, 2009-07-13 A powerful inspiring and achievable vision of a society based on cooperation and

community instead of competition and commodification This book counters the dominant and destructive story that we are polarized violent selfish and destined to consume everything in sight That is not who we are The challenge Peter Block says is that we are suffering under an economic theology that is based on scarcity self interest competition and infinite growth We are told we can purchase and outsource all that matters Block calls this the business perspective narrative It dominates not only the economy but also architecture faith communities journalism arts neighborhoods and much more Block offers an antidote the common good narrative It embodies the belief that we are basically communal and cooperative And that we have the capacity to communally produce what we care most about raising a child safety livelihood health and a clean and sustainable environment This book describes how shifts to the common good perspective could transform many areas fostering journalism that reports on what works architecture that designs habitable spaces creating connection faith collectives that build community a market that is restrained and local and leadership and activism that build social capital by creating trust among citizens With these shifts we would fundamentally change the world we live in for the better

The Sustainable Economics of Elinor Ostrom Derek Wall, 2014-02-24 Elinor Ostrom's Nobel Prize winning work on common pool property rights has implications for some of the most pressing sustainability issues of the twenty first century from tackling climate change to maintaining cyberspace In this book Derek Wall critically examines Ostrom's work while also exploring the following questions is it possible to combine insights rooted in methodological individualism with a theory that stresses collectivist solutions Is Ostrom's emphasis on largely local solutions to climate change relevant to a crisis propelled by global factors This volume situates her ideas in terms of the constitutional analysis of her partner Vincent Ostrom and wider institutional economics It outlines her key concerns including a radical research methodology commitment to indigenous people and the concept of social ecological systems Ostrom is recognised for producing a body of work which demonstrates how people can construct rules that allow them to exploit the environment in an ecologically sustainable way without the need for governmental regulation and this book argues that in a world where ecological realities increasingly threaten material prosperity such scholarship provides a way of thinking about how humanity can create truly sustainable development Given the inter disciplinary nature of Ostrom's work this book will be relevant to those working in the areas of environmental economics political economy political science and ecology

Theologies on the Move Joerg Rieger, 2020-10-13 Theologies on the Move Religion Migration and Pilgrimage in the World of Neoliberal Capital speaks to the reality that many religions have developed in motion with people exploring new boundaries migrating and being displaced Consequently major religious traditions form as they come into contact with other religions and cultures typically in situations of struggle and pressure Due to neoliberal capitalism more people are on the move today than ever before Most are driven by necessity migration due to violence poverty and perceived poverty others by religious quests that are often fueled by experiences of tension pilgrimage The chapters in this volume explore the complexity of these situations examining

in detail how theology and religion shape up in various contexts on the move and investigating specific problems and tensions in order to suggest solutions alternatives and new possibilities **Moving Beyond Capitalism** Cliff DuRand,2016-09-26

The book speaks to the widespread quest for concrete alternative ways forward beyond capitalism in the face of the prevailing corporatocracy and a capitalist system in crisis It examines a number of institutions and practices now being built in the nooks and crannies of present societies and that point beyond capitalism toward a more equal participatory and democratic society institutions such as cooperatives public banks the commons economic democracy This seminal collection of critical studies draws on academic and activist voices from the U S and Canada Mexico Cuba and Argentina and from a variety of theoretical political perspectives Marxism anarchism feminism and Zapatismo The Routledge Companion to Alternative Organization Martin Parker,George Cheney,Valérie Fournier,Chris Land,2014-01-03 Despite the Great Recession slightly different forms of global capitalism are still portrayed as the only game in town by the vast majority of people in power in the world today Unbridled growth trade liberalisation and competition are advocated as the only or best ways of organizing the contemporary world Unemployment yawning gaps between rich and poor political disengagement and environmental devastation are too often seen as acceptable side effects of the dominance of neo liberalism But the reality is that capitalism has always been contested and that people have created many other ways of providing for themselves This book explores economic and organizational possibilities which extend far beyond the narrow imagination of economists and management theorists Chapters on co operatives community currencies the transition movement scrounging co housing and much more paints a rich picture of the ways in which another world is not only possible but already taking shape The aim of this companion is to move beyond complaining about the present and into exploring this diversity of organisational possibilities Our starting point is a critical analysis of contemporary global capitalism is merely the opening for thinking about organizing as a form of politics by other means and one that can be driven by the values of solidarity freedom and responsibility This comprehensive companion with an international cast of contributors gives voice to forms of organizing which remain unrepresented or marginalised in organizational studies and conventional politics yet which offer more promising grounds for social and environmental justice It is a valuable resource for students activists and researchers interested in alternative approaches to economy and society in a variety of disciplinary and interdisciplinary fields

Stewardship Peter Block,2013-05-20 Revised and expanded this classic guide to business leadership presents an original and profound new view on how to run an organization Library Journal Despite all the evidence calling for change most organizations still rely on patriarchy and control as their core form of governance The result is that they stifle initiative and spirit and alienate people from their work In Stewardship Peter Block calls for a dramatic shift in how we distribute power privilege and the control of money Stewardship he writes is the willingness to be accountable for the well being of the larger organization by operating in service rather than in control of those around us Block has revised and updated the book

throughout including a new introduction addressing what has changed and what hasn't in the twenty years since the book was published. It also includes a new chapter on applying stewardship to the common good of the wider community. Speaking in practical terms about how stewardship transforms every function and department for the better. Block also offers tactical advice on gearing up to implement these reforms.

With Liberty and Dividends for All Peter Barnes, 2014-08-04 Peter Barnes argues that because of globalization automation and winner take all capitalism there won't be enough high paying jobs to sustain America's middle class in the future. Therefore to survive economically our middle class needs and deserves a supplementary source of nonlabor income. To meet this need Barnes proposes to give every American a share of the wealth we own together starting with our air and financial infrastructure. These shares would pay dividends of several thousand dollars per year money that wouldn't be welfare or wealth redistribution but legitimate property income.

Reclaiming the Commons for the Common Good Heather Menzies, 2014-05-13 An engaging and intimate journey of personal and political discovery.

The Heart of Sustainability Andres Edwards, 2015-11-01 A thriving life and livable future for our planet starts with you. Amidst the doom and gloom that dominates the headlines a different kind of story about an alternative and sustainable future is unfolding. The players are social activists visionaries revolutionaries and cultural innovators the backdrop is this Anthropocene the tipping point of our global and environmental challenges and the narrative is the molding of a new paradigm to shape our collective future and make environmental change. *The Heart of Sustainability* delves into the human dimension of this burgeoning international movement with an aim to become climate activists and build a better world. Author Andr's Edwards frames the conversation about consciousness activism innovation and sustainability by explaining how self development is a key driver for environmental planetary change. Describing how the confluence of the consciousness and technological revolutions provide unique opportunities for balance and fulfillment. Exploring how we can move forward individually and collectively to create a thriving livable future from the inside out during this Anthropocene. This landmark work illustrates the integration of the four Es ecology economy equity and education the bedrock of the current sustainability framework with the four Cs conscious creative compassionate and connected. Focusing on specific examples and concrete initiatives from social activists around the world it shows us how to reconnect with ourselves each other and nature in order to tackle the climate change challenges we face as a global community. Andr's R Edwards is the author of the award winning *Thriving Beyond Sustainability* and *The Sustainability Revolution*. He is also the founder and president of EduTracks a firm specializing education programs and consulting services on sustainable practices for museums zoos aquariums culture and history centers.

Enlivenment Andreas Weber, 2019-03-05 A new understanding of the Anthropocene that is based on mutual transformation with nature rather than control over nature. We have been told that we are living in the Anthropocene a geological era shaped by humans rather than by nature. In *Enlivenment* German philosopher Andreas Weber presents an alternative understanding of our relationship with nature arguing not that humans control nature

but that humans and nature exist in a commons of mutual transformation There is no nature human dualism he contends because the fundamental dimension of existence is shared in what he calls aliveness All subjectivity is intersubjectivity Self is self through other Seeing all beings in a common household of matter desire and imagination an economy of metabolic and economic transformation is enlivenment This perspective allows us to move beyond Enlightenment style thinking that strips material reality of any subjectivity To take this step Weber argues we need to supplant the concept of techn with the concept of poiesis as the element that brings forth reality In a world not divided into things and ideas culture and nature reality arises from the creation of relationships and continuous fertile transformations any thinking in terms of relationships comes about as a poetics The self is always a function of the whole the whole is equally a function of the individual Only this integrated freedom allows humanity to reconcile with the natural world This first English edition of Enlivenment has been expanded and updated from the German edition

Civic Self-respect Ralph Nader, 2025-04-15 An inspiring exploration of democracy that separates the concept of a citizen into various roles providing a clarifying mission to all who read this call to action and civic participation In this concise volume Ralph Nader our trusted voice on corporate power and civic resistance goes right to the most basic taproots of an aspiring democracy its people and their roles in creating and sustaining community These roles including citizen voter worker taxpayer consumer and parent contribute to civic self respect and one s own significance in society As federal judge Learned Hand said in 1944 during a famous brief speech at Central Park New York City neither the laws the courts or other related institutions can be saved without the underlying exercise of the democratic spirit by the people Civic Self Respect argues the importance to recognize the centrality in the development of a civic personality as distinguished from a private personality with the two co existing for a moral life participating in the common good As Nader s mother said when her friends would wonder how she could be raising four children and still have so much time for community engagements What s the difference One depends on each other the family and the community This book argues for how important it is for our educational system to teach the essentials of civic responsibility beyond its occupational or technical emphasis because the emergence of such a public minded personality is so essential for understanding the world and shaping civil societies

Movements of Movements Jai Sen, 2018-02-01 Our world today is not only a world in crisis but also a world in profound movement with increasing numbers of people joining or forming movements local national transnational and global The dazzling diversity of ideas and experiences recorded in this collection captures something of the fluidity within campaigns for a more equitable planet This book taking internationalism seriously without tired dogmas provides a bracing window into some of the central ideas to have emerged from within grassroots struggles from 2006 to 2010 The essays here cross borders to look at the politics of caste class gender religion and indigeneity and move from the local to the global Rethinking Our Dance the second of two volumes offers a wide range of essays from frontline activists in Afghanistan Argentina Brazil Niger and Taiwan as well as from Europe and North America that address the question What do

we need to do in order to bring about justice and peace The Movements of Movements aims to make the bewildering range of contemporary movements more meaningful to the observer and also to be a space where global movements speak to each other This book will be useful to all who work for egalitarian social change be they in universities parties trade unions social movements or religious organisations Contributors include Kolya Abramsky Ezequiel Adamovsky Ousseina Alidou Samir Amin Chris Carlsson John Brown Childs Lee Cormie Anila Daulatzai Massimo De Angelis The Free Association David Graeber Josephine Ho John Holloway Fran ois Houtart Jeffrey Juris Michael L wy Tom s Mac Sheoin Matt Meyer Muto Ichiyo Rodrigo Nunes Michal Osterweil Shailja Patel Geoffrey Pleyers Stephanie Ross and Nicola Yeates

We Built a Village Diane Rothbard Margolis,2022-08-23 Describes the development of one of the first cohousing communities in the U S offering a social understanding of its commons Cohousing a form of communal living that clusters around shared common space began about a half century ago in Denmark We Built a Village describes the process of planning and building of an early cohousing community in Cambridge Massachusetts and the way the people involved simultaneously built their homes and their social structure As both a memoir and a sociological analysis that probes the differences between commons and markets it is unique among books about cohousing When this group of people began in the late 1990s to construct their cohousing community they set in motion a counterpoint between the physical spaces and the social configurations that would guide their lives together even up to creative responses to the recent pandemic

Barbed Wire Patrick Brantlinger,2017-11-22 A call to transform the way we think about property this book examines how capitalism has from its origins sought to enclose or privatize the commons or land and other forms of property that had been viewed as communally owned and argues that neoliberal economic policies and the corporate takeovers of urban spaces prisons schools the mass media farms and natural resources have failed to serve the public interest A study of corporate globalization and the continuation of empire after the era of political decolonization it begins with the fencing of the West starting in the 1870s and moves to examine recent phenomena such as urbanization mass incarceration financialization and the treatment of people as commodities in the context of the longue dur e of land enclosures empire and capitalism Highlighting the threatened elimination of the public domain as a result of corporate efforts to privatize public utilities prisons schools forests seeds and just about everything else that can yield a profit Barbed Wire Capitalism and the Enclosure of the Commons asks what it would mean if instead of either private or public property our most fundamental conception of property were communal Would a redefinition of property from a community perspective lead us beyond the military industrial complex

Regulating Coastal Zones Rachelle Alterman,Cygal Pellach,2020-11-26 Regulating Coastal Zones addresses the knowledge gap concerning the legal and regulatory challenges of managing land in coastal zones across a broad range of political and socio economic contexts In recent years coastal zone management has gained increasing attention from environmentalists land use planners and decision makers across a broad spectrum of fields Development pressures along coasts such as high end tourism projects

luxury housing ports energy generation military outposts heavy industry and large scale enterprise compete with landscape preservation and threaten local history and culture Leading experts present fifteen case studies among advanced economy countries selected to represent three groups of legal contexts signatories to the 2008 Mediterranean ICZM Protocol parties to the 2002 EU Recommendation on Integrated Coastal Zone Management and the USA and Australia This book is the first to address the legal regulatory aspects of coastal land management from a systematic cross national comparative perspective By including both successful and less effective strategies it aims to inform professionals graduate students policy makers and NGOs of the legal and socio political challenges as well as the better practices from which others could learn **2020s**
