Our Posthuman Future Consequences Of The Biotechnology Revolution:

Our Posthuman Future Francis Fukuyama,2003-05 A social philosopher examines how the foundation of liberal democracy which is the belief that all human beings are equal by nature could be shattered by the biotechnology revolution

Our Posthuman Future Francis Fukuyama,2004 Arguing that the greatest advances still to come will be in the life sciences Fukuyama asks how the ability to modify human behavior will affect liberal democracy He underlines man s changing understanding of human nature through history from Plato Aristotle s belief that man had natural ends to the ideals of utopians dictators of the modern age who sought to remake mankind for ideological ends The ultimate prize of the biotechnology revolution intervention in the germ line the ability to manipulate the DNA of all of one person s descendants will have profound potentially terrible consequences for our political order even if undertaken by ordinary parents seeking to improve their children

Screening the Posthuman Missy Molloy, Pansy Duncan, Claire Henry, 2023 From AI to climate change recent technological ecological and cultural transformations have unsettled established assumptions about the relationship between the human and the more than human world Screening the Posthuman addresses a heterogeneous body of twenty first century films that turn to the figure of the posthuman as a means of exploring this development Through close analyses of films as diverse as *Kikuri* dir Hirokazu Koreeda 2009 *Testosterone* dir Ildiko Enyedi 2017 and *Nomadland* dir Chlo Zhao 2020 this wide ranging volume shows that while often identified as the remit of science fiction the posthuman on screen crosses filmic genres national

contexts and industrial settings In the process posthuman cinema emphasizes humanity's entanglement in broader biological technological and social worlds and exposes new models of subjectivity community and desire In advancing these arguments Screening the Posthuman draws on scholarship associated with critical posthumanist theory an ongoing project unified by a decentering of the human As the first systematic full length application of this body of scholarship to cinema Screening the Posthuman advocates for a rigorous posthumanist critique that avoids both humanist nostalgia and transhumanist fantasy in its attention to the excitements and anxieties of posthuman experience

Prophets of the Posthuman Christina Bieber Lake, 2013-09-30 Prophets of the Posthuman provides a fresh and original reading of fictional narratives that raise the question of what it means to be human in the face of rapidly developing bioenhancement technologies Christina Bieber Lake argues that works

by Nathaniel Hawthorne Walker Percy Flannery O'Connor Toni Morrison George Saunders Marilynne Robinson Raymond Carver James Tiptree Jr and Margaret Atwood must be reevaluated in light of their contributions to larger ethical questions Drawing on a wide range of sources in philosophical and theological ethics Lake claims that these writers share a commitment to maintaining a category of personhood more meaningful than that allowed by utilitarian ethics *Prophets of the Posthuman* insists that because technology can never ask whether we should do something that we have the power to do literature must step into that role Each of the chapters of this interdisciplinary study sets up a typical ethical scenario regarding human enhancement technology and then illustrates how a work of fiction uniquely speaks to that scenario exposing a realm of human motivations that might otherwise be overlooked or simplified Through the vision of the writers she discusses Lake uncovers a deep critique of the ascendancy of personal autonomy as America's most cherished value This ascendancy coupled with technology's glamorous promises of happiness helps to shape a utilitarian view of persons that makes responsible ethical behavior toward one another almost impossible *Prophets of the Posthuman* charts the essential role that literature must play in the continuing conversation of what it means to be human in a posthuman world

Coming to Our Senses Dierdra Reber, 2016-02-02 *Coming to Our Senses* positions affect or feeling as our new cultural compass ordering the parameters and possibilities of what can be known From Facebook likes to Coca Cola loves from emotional intelligence in business to emotional contagion in social media affect has displaced reason as the primary catalyst of global culture Through examples of feeling in the books film music advertising cultural criticism and political discourse of the United States and Latin America Reber shows how affect encourages the public to reason on the strength of sentiment alone Well being represented by happiness and health and ill being embodied by unhappiness and disease form the two poles of our social judgment whether in affirmation or critique We must then reenvision contemporary politics as operating at the level of the feeling body so we can better understand the physiological and epistemological conditions affirming our cultural status quo and contestatory strategies for emancipation
