HCI in Mobility, Transport, and Automotive Systems Heidi Krömker, 2019-07-10 This book constitutes the refereed proceedings of the First International Conference on HCI in Mobility Transport and Automotive Systems MobiTAS 2019 held as part of the 21st International Conference on Human Computer Interaction HCII 2019 in Orlando FL USA in July 2019 The 1274 full papers and 209 posters presented at the HCII 2019 conferences were carefully reviewed and selected from 5029 submissions The papers cover the entire field of human computer interaction addressing major advances in knowledge and effective use of computers in a variety of application areas The papers in this volume are organized in the following topical sections interaction in autonomous and semiautonomous vehicles driving experience and mobility and transport

Advances in The Ergonomics in Manufacturing: Managing the Enterprise of the Future Stefan Trzcielinski, Waldemar Karwowski, 2020-07-19 Contemporary manufacturing enterprises aim to deliver a great number of consumer products and systems through friendly and satisfying working environments for people who are involved in manufacturing services Meeting the needs of the manufacturing and service sectors of contemporary industry this volume is concerned with the human factors ergonomics and safety issues related to the design of products processes and systems as well as the operation and management of business enterprises This book will be of special value to researchers and practitioners involved in the design of products processes systems and services which are marketed and utilized by a variety of organizations around the world

Designing Interaction and Interfaces for Automated Vehicles Neville Stanton, Kirsten M. A. Revell, Patrick Langdon, 2021-03-10 Driving automation and autonomy are already upon us and the problems that were predicted twenty years ago are beginning to appear These problems include shortfalls in expected benefits equipment unreliability driver skill fade and error inducing equipment designs Designing Interaction and Interfaces for Automated Vehicles User Centred Ecological Design and Testing investigates the difficult problem of how to interface drivers with automated vehicles by offering an inclusive human centred design process that focusses on human variability and capability in interaction with interfaces This book introduces a novel method that combines both systems thinking and inclusive user centred design It models driver interaction provides design specifications concept designs and the results of studies in simulators on the test track and in road going vehicles This book is for designers of systems interfaces interactions UX Human Factors and Ergonomics researchers and practitioners involved with systems engineering and automotive academics

_ In this book Prof Stanton and colleagues show how Human Factors methods can be applied to the tricky problem of interfacing human drivers with vehicle automation They have developed an approach to designing the human automation interaction for the handovers between the driver and the vehicle This approach has been tested in driving simulators and most interestingly in real vehicles on British motorways The approach called User Centred Ecological Interface Design has been validated against driver behaviour and used to support their ongoing work on vehicle automation I highly recommend

this book for anyone interested or involved in designing human automation interaction in vehicles and beyond Professor Michael A Regan University of NSW Sydney AUSTRALIA *Automotive Human-Machine Interaction (HMI) Evaluation Method* Jun Ma,Zaiyan Gong,2024-05-15 This book focuses on the evaluation methodology for automotive human machine interaction HMI which aim to reduce driving distractions lower operational loads optimize user experience design and enhance user value The book is divided into three parts The first part consisting of Chapters 1 3 introduces the evolution of automotive HMI and proposes a three dimensional orthogonal evaluation system for automotive HMI that is comprehensive systematic and quantifiable This evaluation system incorporates all evaluation items into a spatial matrix consisting of three dimensions interaction tasks interaction modalities and evaluation indexes The second part provides a comprehensive presentation and in depth discussion of the evaluation indexes The three rational evaluation indexes are utility safety and efficiency which can be tested by the real car driving simulator The four emotional evaluation indexes are cognition intelligence value and aesthetics In orderto standardize the latter two subjective indexes this book summarizes common differences in value between Chinese and European users and organizes typical aesthetic orientations in automotive UI based on art history research The third part introduces the application of this HMI evaluation system in the automotive R D process including how to integrate the evaluation into a real product development process to achieve efficient product iteration This book is suitable for intelligent cockpit and HMI designers engineers and researchers It is also used as a reference for product managers and students in the field of intelligent connected vehicles
