logistics activities seaports have traditionally been the focus of maritime logistics chains However changes in production  
patterns supported by the development of rapid transport of goods over long distances have altered the logistics landscape  
As a result the relevance of port hinterland transport has become more important with a consequent need for the high  
utilisation of transport resources and infrastructure through the consolidation of cargo flows and for seaports to extend their  
influence within their hinterlands to increase their competitiveness The development worldwide of inland ports terminals and  
dryports in their various forms together with associated new functions and strategies address these challenges in diverse  
ways to realise the potential benefits that come from the successful implementation of inland ports that connect seamlessly  
into transportation systems This book comprises case studies and state of the art examples of dryports in different parts of
