**Monument Builders** Edwin Heathcote, 1999-03-02 This is a study of buildings created to honour the dead It explores the links between socio religious and existential perceptions of death and how this has been interpreted in architecture over the 20th century *Modern Architecture and the Sacred* Ross Anderson, Maximilian Sternberg, 2020-11-26 This edited volume

*Modern Architecture and the Sacred* presents a timely reappraisal of the manifold engagements that modern architecture has had with the sacred It comprises fourteen individual chapters arranged in three thematic sections Beginnings and Transformations of the Modern Sacred Buildings for Modern Worship and Semi Sacred Settings in the Cultural Topography of Modernity The first interprets the intellectual and artistic roots of modern ideas of the sacred in the post Enlightenment period and tracks the transformation of these in architecture over time The second studies the ways in which organized religion responded to the challenges of the new modern self understanding and then the third investigates the ways that abstract modern notions of the sacred have been embodied in the ersatz sacred contexts of theatres galleries memorials and museums While centring on Western architecture during the decisive period of the first half of the 20th century a time that takes in the early musings on spirituality by some of the avant garde in defiance of Sachlichkeit and the machine aesthetic the volume also considers the many varied appropriations of sacrality that architects have made up to the present day and also in social and cultural contexts beyond the West **Visualizing Modern China** James A. history and design of burial places throughout Europe and the USA *Last Landscapes* is an exploration of the cult and

celebration of death loss and memory      Columbarium Tombs and Collective Identity in Augustan Rome Dorian Borbonus,2019-05-16 Columbarium tombs are among the most recognizable forms of Roman architecture and also among the most enigmatic The subterranean collective burial chambers have repeatedly sparked the imagination of modern commentators but their origins and function remain obscure Columbarium Tombs and Collective Identity in Augustan Rome situates columbaria within the development of Roman funerary architecture and the historical context of the early Imperial period Contrary to earlier scholarship that often interprets columbaria primarily as economic burial solutions Dorian Borbonus shows that they defined a community of people who were buried and commemorated collectively Many of the tomb occupants were slaves and freed slaves for whom collective burial was one strategy of community building that counterbalanced their exclusion in Roman society Columbarium tombs were thus sites of social interaction that provided their occupants with a group identity that this book shows was especially relevant during the social and cultural transformation of the Augustan era      Modern Hospice Design Ken Worpole,2009-05-13 There is a global public debate going on about care for the elderly and the dying and what is meant by good quality palliative care This book begins with the rise of the modern hospice movement begun in 1967 Today there are 8 500 modern hospice projects in 123 countries The hospice has become an iconic building for this new culture This is not a book about hospitals as such but about what lessons the hospice movement has for new ideas about buildings for healthcare across the world For architects and interior designers estate and facility managers involved in hospice design healthcare professionals hospital administrators and Heathcare Trust Boards      The Mourner's Dance Katherine Ashenburg,2004-09-01 When her daughter s fianc died suddenly Katherine Ashenburg was surprised to see how her daughter intuitively re created the traditional rituals of mourning even those of which she was ignorant Intrigued Ashenburg began to explore the rich and endlessly inventive choreographies different cultures and times have devised to mark a universal and deeply felt plight Contemporary North American culture favors a mourning that is private and virtually invisible But as Ashenburg reveals the grieving customs of the past were so integrated into daily life that ultimately they gave rise to public parks and ready to wear clothing Our keepsakes prescribed bereavement garb resting places mourning etiquette and ways of commiserating from wakes to Internet support groups remain clues to our most elemental beliefs and our most effective means of restoring selves and communities unraveled by loss      **Monuments for Posterity** Antony Kalashnikov,2023-04-15 Monuments for Posterity challenges the common assumption that Stalinist monuments were constructed with an immediate propagandistic function arguing instead that they were designed to memorialize the present for an imagined posterity In this respect even while pursuing its monument building program with a singular ruthlessness and on an unprecedented scale the Stalinist regime was broadly in step with transnational monument building trends of the era and their undergirding cultural dynamics By integrating approaches from cultural history art criticism and memory studies along with previously unexplored archival material Antony Kalashnikov

examines the origin and implementation of the Stalinist monument building program from the perspective of its goal to immortalize the memory of the era He analyzes how this objective affected the design and composition of Stalinist monuments what cultural factors prompted the sudden and powerful yearning to be remembered and most importantly what the culture of self commemoration revealed about changing outlooks on the future both in the Soviet Union and beyond its borders Monuments for Posterity shifts the perspective from monuments political ideological content to the desire to be remembered and prompts a much needed reconsideration of the supposed uniqueness of both Stalinist aesthetics and the temporal culture that they expressed Many Stalinist monuments still stand prominently in postsocialist cityscapes and remain the subject of continual heated political controversy Kalashnikov makes manifest monuments intentional attempts to seduce us the posterity for whom they were built **The Barcelona Reader** Enric Bou,Jaume Subirana,2017-07-24 The first comprehensive Reader to accompany the remarkable city of Barcelona Vernacular Architecture Newsletter ,2000

*Places of Public Memory* Greg Dickinson,Carole Blair,Brian L. Ott,2010-08-02 Though we live in a time when memory seems to be losing its hold on communities memory remains central to personal communal and national identities And although popular and public discourses from speeches to films invite a shared sense of the past official sites of memory such as memorials museums and battlefields embody unique rhetorical principles *Places of Public Memory The Rhetoric of Museums and Memorials* is a sustained and rigorous consideration of the intersections of memory place and rhetoric From the mnemonic systems inscribed upon ancient architecture to the roadside acci *The Oxford Dictionary of Architecture* James Stevens Curl,Susan Wilson,2015 With over 6 000 entries this is the most authoritative dictionary of architectural history available When Buildings Speak Anthony Alofsin,2006 The canonical inventors of International Style have long dominated studies of modern European architecture But in this text Anthony Alofsin broadens this scope by exploring the rich yet overlooked architecture of the late Austro Hungarian Empire and its successor states *RIBA Journal* ,1999 **A Place to Remember** Bruce Scates,2009-11-04 This book charts the Shrine s history from the first fatalities of the Gallipoli landing to the present day **The Memorial to the Missing of the Somme** Gavin Stamp,2010-08-06 Edwin Lutyens Memorial to the Missing of the Somme at Thiepval in Northern France visited annually by tens of thousands of tourists is arguably the finest structure erected by any British architect in the twentieth century It is the principal tangible expression of the defining event in Britain s experience and memory of the Great War the first day of the Battle of the Somme on 1 July 1916 and it bears the names of 73 000 soldiers whose bodies were never found at the end of that bloody and futile campaign This brilliant study by an acclaimed architectural historian tells the origin of the memorial in the context of commemorating the war dead it considers the giant classical brick arch in architectural terms and also explores its wider historical significance and its resonances today So much of the meaning of the twentieth century is concentrated here the Thiepval Memorial to the Missing casts a shadow into the future a shadow which extends beyond the dead of the Holocaust to the

Gulag to the disappeared of South America and of Tianenmen Reissued in a beautiful and striking new edition for the centenary of the Somme      **Letter to a Future Lover** Ander Monson,2015-02-03 An exuberant expansive cataloging of the intimate physical relationship between a reader and a book A way to leave a trace of us who we were or wanted to be what we read and could imagine what we did and what we left for you Readers of physical books leave traces marginalia slips of paper fingerprints highlighting inscriptions All books have histories and libraries are not just collections of books and databases but a medium of long distance communication with other writers and readers Letter to a Future Lover collects several dozen brief pieces written in response to library ephemera with library defined broadly ranging from university institutions to friends shelves from a seed library to a KGB prison library and addressed to readers past present and future Through these witty idiosyncratic essays Ander Monson reflects on the human need to catalog preserve and annotate the private and public pleasures of reading the nature of libraries and how the self can be formed through reading and writing

**The Second World War and the 'Other British Isles'** Daniel Travers,2018-06-28 What is often held to be Britain's finest hour the Second World War was not experienced so uniformly across the British Isles On the margins the war was endured in profoundly different ways While D Day or Dunkirk is embedded in British collective memory how many Britons can recall that Finns were interned on the Isle of Man that enemy soldiers developed British infrastructure in Orkney or that British subjects were sent to concentration camps from Guernsey Such experiences tangential to the dominant British war narrative are commemorated elsewhere in the other British Isles In this remarkable contribution to British Island Studies Daniel Travers pursues these histories and their commemoration across numerous local sites of memory museums heritage sites and public spaces He examines the way these island identities assert their own distinctiveness over the British wartime story and ultimately the way they fit into the ongoing discourse about how the memory of the Second World War has been constructed since 1945      **Memorials in Berlin and Buenos Aires** Brigitte Sion,2014-12-01 The Memorial to the

Murdered Jews in Berlin inaugurated in 2005 and the Monument to the Victims of State Terrorism within the Memory Park Parque de la Memoria in Buenos Aires partially unveiled in 2007 have been controversial from start to finish While these sites differ in many respects Germany and Argentina share a history of dictatorial regimes that murdered civilians on a massive scale The Nazis implemented the genocide of millions of Jews and other minorities during World War II In Argentina the junta led state repression was responsible for the disappearance and subsequent murder of thousands of civilians between 1976 and 1983 Decades later new governments in Germany and Argentina acknowledged the responsibility of their respective states for these mass murders by memorializing the victims with a national monument in the capital city for the first time This study of two memorials develops a model and method for analyzing the memorialization of recent tragedies that share several basic characteristics the state creates a self indicting national memorial to the victims of state sponsored mass murder in the absence of their bodies Analyzed as sites of conflicting performances and as performances themselves

these memorials illuminate the ways in which people engage with them and how an architecture of absence triggers embodied memory through somatic experience While death tourism and architourism are a key to their success in attracting visitors they also pose a threat to their commemorative role Besides assessing the success and failure of these memorials Sion explores the ways in which these sites are paradigmatic and offers a model for analyzing a transnational circuit of commemorative practices
