Prior Knowledge Questions (Do these BEFORE using the Gizmo.)

- Supposed you were stranded on the equatorial island of Hainan in China. How would you know which way is north, or a past that point? I don't know. I would just wait till the sun is either up or down, I would either be looking directly towards it or away from it. Or I would turn it.
- How could you determine all your time? if it showed a watch.

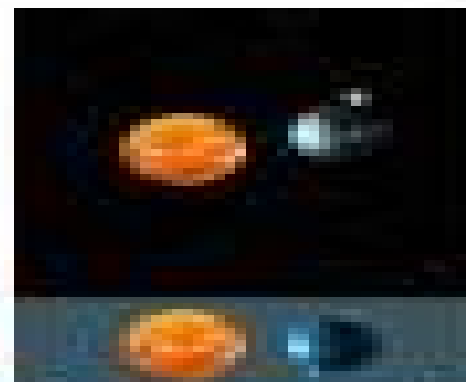

Warm-Up

Thousands of years ago, people were already looking at the sky. They figured out how to predict the seasons, and how the stars and the planets moved. Scientists today have learned a lot about how these things work, and how they are connected.

In the Seasons: Earth, Moon, and Sun Gizmo, you will learn how the Earth and the Moon move, and how these movements affect the seasons.

Click the **Simulation** button at the top right of the Gizmo. (You can also click the **Play** button.)

- What happens? The Earth is rotating.
- What does the Earth look like from the Sun? The Sun is in the center, and the Earth is to the right.
- What does the Earth look like from the Moon? The Earth is in the center, and the Moon is to the right.
- What does the Earth look like from the Sun? Nothing, the Earth is in the center, and the Moon is to the right.
