

Mooney Problem Checklist

Author and year

The Mooney problem checklist was developed by Ross L Mooney and Leonard V Gordon in 1950.

Introduction

Mooney Problems Checklist helps adolescents and adults to express personal problems and is also useful for increasing teacher understanding of students and for preparing students for counseling interviews. It helps to identify and discuss their problems related to educational settings.

Four forms of checklist were published for different age range. Its target population is adults, college, high school and junior high school. It helps adolescents and adults to express personal problems and it is useful for increasing teacher understanding of students and for preparing students for Counseling interviews.

Mooney problem checklist is an effective way to identify problems that are hindering the learning process of students. This checklist makes individuals think about their educational problems in a deeper way. This checklist is a form of simple communication between student and counselor.

Objectives

- **Express personal problems:** Mooney problem checklist helps students to express their personal problems. Means they are free to express their all problems concerning school, health, education, homework, classroom conflicts. Students first identify and underline problems and discuss them. This enables students to solve their problems.
- **Stressed for exams:** As we know all students worry for their upcoming exams. These students also face problems regarding the preparation of exams. Some are confused and some feel anxiety. And some are worried about their marks. And some are pressurized by their parents to get top positions. And some students have passion for hard work and they want to achieve their goals.
- **Identify specific issues:** This checklist helps to identify specific psychological issues such as anxiety, depression, substance abuse and emotional distress. Because most students are facing these problems but they can't express. Even their parents are not aware that their child is suffering from that problem.
- **Assessment of Severity:** It allows professionals to assess the severity of each problem, enabling them to prioritize intervention based on urgency.
- **Treatment Planning:** By systematically documenting their problems, this checklist helps to develop an effective treatment plan.
- **Research and evaluation:** This checklist is used in research settings to study the prevalence of psychological problems within specific populations.

Rehabilitation of the Brain-Damaged Adult Gerald Goldstein,Leslie Ruthven,2013-03-07 Basic Issues in Rehabilitation of the Brain Damaged Definitions Because of the vagueness surrounding the term brain damage it is necessary at the outset to define the population to which this book may have some application Although it is usual to speak of the brain damaged patient in a general way the conditions referred to cover a variety of specific disorders In this book we will be discussing only individuals who become brain damaged as adults We will be addressing ourselves specifically to

adults who have sustained demonstrable structural brain damage Those conditions in which brain dysfunction is a possible etiological agent such as a number of functional psychiatric disorders will not be considered Thus the entire topic of mental retardation and early life brain damage will not be treated here nor the many problems associated with minimal brain damage syndromes in school age children Modern psychiatric thinking has tended to blur the distinction between the so called functional and organic disorders of Shagass Gershon Friedhoff 1977 but we would add here to the view that the patient with structural brain damage continues to present relatively unique assessment and treatment problems Furthermore the emphasis of this book will be placed on individuals with nonprogressive chronic brain damage

Problems of Adolescence in the Secondary School Geoff Lindsay, 2018-04-17 Published in 1983 Adolescence is a period of change for all and turmoil for some Many adolescents have problems which are easily identified but for others the problems are more subtle There is an interaction between their own difficulties and the systems of home school and their own society In this case problems which are very real are more difficult to define and to deal with This book aims to help teachers to recognise and understand the common problems of adolescents as they are relevant to their schooling In addition suggestions are made to help both teachers and adolescents overcome these difficulties Besides the more immediately obvious issues of learning and behaviour there is also discussion of sexual behaviour vandalism and substance abuse Throughout the book the common theme is that all problem behaviour must be understood and acted upon within a context and not regarded as examples of individual delinquency Finally the implications of the 1981 Education Act and its impact on teachers is considered Under this law a much wider range of young people will be deemed to have special educational needs Consequently all teachers of adolescents will need to be aware of the issues raised and discussed in this book
