Psychology and Constructivism in International Relations Vaughn P. Shannon, Paul A. Kowert, 2012 Psychology and constructivism together offer new ways of understanding international relations **International Ethics** Mark R. Amstutz, 2025-07-10 Through case studies and careful arguments this book shows that moral values are an essential element of foreign policy and that ethical analysis is indispensable to the study of international relations Mark Amstutz explores two distinct dimensions of international political morality the role of moral norms in foreign affairs and the ethical foundation of the rules institutions and structures of global society Amstutz illustrates the role of moral norms in global politics through twenty six case studies assessing the nature role and impact of political morality on international relations The cases address six major global issues migration human rights war irregular war foreign intervention and international economic relations The book s third section examines justice among states and the challenge of pursuing global justice The Ethics of Destruction Ward Thomas, 2001 Many assume that in international politics and especially in war anything goes Sherman famously declared war is all hell The implication behind the maxim is that in war there is no order only chaos no mercy only cruelty no restraint only suffering Ward Thomas finds that this anything goes view is demonstrably wrong It neither reflects how most people talk about the use of force in international relations nor describes the way national leaders actually use military force Events such as those in Europe during World War II in the Persian Gulf War and in Kosovo cannot be understood he argues until we realize that state behavior even during wartime is shaped by common understandings about what is ethically acceptable and unacceptable Thomas makes extensive use of two cases the assassination of foreign leaders and the aerial bombardment of civilians to trace the relative influence of norms and interests His insistence on interconnections between ethical principle and material power leads to a revised understanding of the role of normative factors in foreign policy and the ways in which power and interest shape the international system **A Practice of Ethics**

for Global Politics Jack L. Amoureux, 2015-10-05 What kind of ethics in world politics is possible if there is no foundation for moral knowledge or global reality is at least complex and contingent Furthermore how can an ethics grapple with difference a persistent and confounding feature for global politics This book responds to the call for a bold and creative approach to ethics that avoids assuming or aspiring to universality and instead prioritizes difference complexity and uncertainty by turning to reflexivity not as method or methodology but as a practice of ethics for politics This practice ethical reflexivity offers individuals organizations and communities tools to recognize interrogate and potentially change the stories they tell about politics about constraints notions of responsibility and visions of desirability The benefits and limits of ethical reflexivity are investigated by the author who engages writing on critique rhetoric affect and relationality and carefully considers dominant and alternative framings of difficult issues in International Relations IR the 1994 genocide in Rwanda and the US policies of enhanced interrogation and drone strikes This path breaking study provokes new possibilities for agency and action and contributes to a growing literature in IR on reflexivity by uniquely elaborating its promise as an ethics for politics and by drawing on thinkers less utilized in discussions of reflexivity such as Hannah Arendt Michel Foucault and Aristotle This book will appeal to scholars and upper level graduates in several sub fields of IR including international global ethics IR theory global governance international organizations non governmental organizations foreign policy analysis and US foreign policy
