More Than They Promised Thomas E. Bonsall, 2022 This lavishly illustrated book on the famous automobile manufacturer traces the Studebaker family from its arrival in America in 1736 to the beginnings of the wagon business under John M Studebaker and his brothers in the nineteenth century to the family's entry into the automobile industry in 1902 to the last Studebaker automobile to roll off the assembly line in 1966 The book however is much more than the story of a family business it is also in microcosm the story of the industrial development of America The Studebakers had always been industrialists in the sense that they made their living by manufacturing things albeit on a small scale When the Industrial Revolution hit the country with full force spurred on by the Civil War it transformed America from a rural agrarian society into an urban industrial one The fortunes of the Studebaker family were transformed with it As the title suggests the Studebaker story was mostly one of success Studebaker wagons and carriages were long noted for their quality and popularity and so too were Studebaker automobiles The 1953 Starliner and the 1963 Avanti designed under Raymond Loewy's direction are widely regarded as among the most innovative examples of American industrial design The book deals in detail with the soaring prosperity of the company in the 1920s the bankruptcy and miraculous recovery in the 1930s the stupendous success of the early post World War II period and the eventual decline of the company's fortunes in the mid 1950s It describes the development of such famous models as the Lark Avanti and Gran Turismo Hawk with special attention paid to the Avanti II a surprisingly successful spinoff from the dying company that continued to be produced until 1991 The final chapter on why Studebaker died is tightly reasoned and more convincing than previous theories Throughout the author has used personal incident and characterization to bring to life the rich tumultuous history of one of America's longest enduring industrial empires

Cold War Nixon in New York Victor Li, 2018-04-02 Richard Nixon's loss in the 1962 gubernatorial election in California was more than just a simple electoral defeat. His once promising political career was in ruins as he dropped his second high profile race in as many years. Nixon himself rubbed salt in his own self-inflicted wounds by delivering a growling bitter concession speech that made him seem like a sore loser. In the months following his defeat and self-immolation, he left California to move to New York so that he could work for a prestigious Wall Street law firm. His new career only seemed to confirm what everyone already knew: Richard Nixon was finished as a politician. Except he wasn't. Nixon's political resurrection was virtually unprecedented in American history, and he had his law firm to thank for paving his way to the White House. His role as public partner at Nixon Mudge Rose Guthrie Alexander was the ideal platform for him as he looked to reinvent himself after his back-to-back losses in 1960 and 1962. Nixon's firm gave him access to deep-pocketed clients, many of whom became donors when he decided to take the plunge in 1968. Furthermore, working for so many international clients allowed him to travel the world and burnish his foreign policy credentials, a vital quality that voters were looking for as the Cold War raged on and the Vietnam War showed no signs of slowing down. Nixon's time at the firm also allowed him to build a formidable campaign staff consisting of top-notch lawyers, researchers, and writers, a staff that did just about everything for him when it came time to ramp up for the 1968 campaign.

City and Campus John W. Stamper, 2024-04-01 City and Campus tells the rich history of a Midwest industrial town and its two academic institutions through the buildings that helped bring these places to life. John W. Stamper paints a narrative portrait of South Bend and the campuses of the University of Notre Dame and Saint Mary's College from their founding and earliest settlement in the 1830s through the boom of the Roaring Twenties. Industrialist giants such as the Studebaker Brothers Manufacturing Company and Oliver Chilled Plow Works invested their wealth into creating some of the city's most important and historically significant buildings. Famous architects including Frank Lloyd Wright brought the latest trends in architecture to the heart of South Bend. Stamper also illuminates how Notre Dame's founder and long-time president, Father Edward Sorin, C.S.C., recruited other successful architects to craft in stone the foundations of the university and the college at the same time as he built the scholarship City. City and Campus provides an engaging and definitive history of how this urban and academic environment emerged on the shores of the St. Joseph River.
