The Curious Person's Guide to Fighting Fake News David G. McAfee, 2020-10-12 With each passing day the potential reach of a single false news story and its ability to negatively impact all of us grows in both size and scope Although politicians activists and ordinary citizens regularly complain about deceptive or biased news reports they tend to define fake news as anything with which they happen to disagree thus compounding the problem even further Seeking to bring some much needed clarity to the subject journalist David G McAfee documents the myriad definitions of fake news and its various incarnations throughout history from ideologically motivated disinformation operations to commercially motivated misinformation campaigns Demonstrating that we are all culpable in the creation of the current pandemic he presents a number of practical and actionable suggestions for combating it In the end however he argues that each of us no matter our political bent have an important role to play in curbing the insidious spread and most dangerous effects of fake news

Anti-vaxxers Jonathan M. Berman, 2020-09-08 A clear and insightful takedown of the anti vaccination movement from its 19th century antecedents to modern day Facebook activists with strategies for refuting false claims of friends and family Financial Times Vaccines are a documented success story one of the most successful public health interventions in history Yet there is a vocal anti vaccination movement featuring celebrity activists including Kennedy scion Robert F Kennedy Jr and actress Jenny McCarthy and the propagation of anti vax claims through books documentaries and social media In Anti Vaxxers Jonathan Berman explores the phenomenon of the anti vaccination movement recounting its history from its

nineteenth century antecedents to today's activism examining its claims and suggesting a strategy for countering them After providing background information on vaccines and how they work Berman describes resistance to Britain's Vaccination Act of 1853 showing that the arguments anticipate those made by today's anti-vaxxers He discusses the development of new vaccines in the twentieth century including those protecting against polio and MMR measles mumps rubella and the debunked paper that linked the MMR vaccine to autism the CDC conspiracy theory promoted in the documentary Vaxxed recommendations for an alternative vaccination schedule Kennedy's misinformed campaign against thimerosal and the much abused religious exemption to vaccination Anti-vaxxers have changed their minds but rarely because someone has given them a list of facts Berman argues that anti-vaccination activism is tied closely to how people see themselves as parents and community members Effective pro-vaccination efforts should emphasize these cultural aspects rather than battling social media posts
