Misiones En Chile Austral Misiones En Chile Austral:

Misiones en Chile austral Rodrigo Moreno Jeria, 2007 La presente obra estudia la vocación misionera jesuita en el contexto americano hacia el inicio del siglo XVII Se centra en el desarrollo de la misión de Chilo que fundada en 1608 se mantuvo hasta el año 1768 fecha en que el último jesuita fue expulsado del archipiélago Indigenous Sacraments Oriol Ambrogio Gali, 2024-12-04 Indigenous Sacraments provides the first study of Indigenous perceptions of the Christian sacraments at the fringes of colonial Spanish America particularly in the missions established by the Jesuits in northwestern Mexico central southern Chile and the Gran Chaco After Jesuit missionaries arrived in these regions between the end of the sixteenth and the early seventeenth centuries their sacraments came to control every rite of passage from birth to reaching adulthood to the formation of new families to death Through the administration of the sacraments missionaries intended to replace extant Indigenous habits and beliefs with Christian values The disruptions triggered by such processes raised multiple local reactions from initial curiosity and incomprehension to rejection partial acceptance and ritual imitation Locals debated the newly introduced rituals and both violently rejected them and developed their own versions becoming active participants in the sacraments diffusion Oriol Ambrogio Gali draws on a range of diverse sources to explore the changing attitudes toward the sacraments and to highlight the cultural and religious evolution of the Indigenous groups living at the fringes of Spanish America By exploring local perceptions of the Christian sacraments Ambrogio Gali shows that Indigenous peoples were far from static recipients of Christianity in the Americas The Jesuit Missions of Paraguay and a Cultural History of Utopia (1568-1789) Girolamo Imbruglia, 2017-08-21 The Jesuit Missions of Paraguay and a Cultural History of Utopia 1568 1789 explores the religious foundations of the Jesuit missions in Paraguay and the discussion of the missionary experience in the public opinion of early modern Europe from Montaigne to Diderot This book presents a wealth of documentation to highlight three key aspects of this debate the relationship between civilisation and religion between religion and political imagination and between utopia and history Girolamo Imbruglia's analysis of the Jesuits own narrative reveals that the idea and the practice of mission have been one of the essential features of the European identity and of the shaping modern political thought Encounters in the New World Mirela Altic, 2022-07-08 Analyzing more than 150 historical maps this book traces the Jesuits significant contributions to mapping and mapmaking from their arrival in the New World In 1540 in the wake of the tumult brought on by the Protestant Reformation Saint Ignatius of Loyola founded the Society of Jesus also known as the Jesuits The Society's goal was to revitalize the faith of Catholics and to evangelize to non Catholics through charity education and missionary work By the end of the century Jesuit missionaries were sent all over the world including to South America In addition to performing missionary and humanitarian work Jesuits also served as cartographers and explorers under the auspices of the Spanish Portuguese and French crowns as they ventured into remote areas to find and evangelize to native populations In Encounters in the New World Mirela Altic analyzes more than 150 of

their maps most of which have never previously been published She traces the Jesuit contribution to mapping and mapmaking from their arrival in the New World into the post suppression period placing it in the context of their worldwide undertakings in the fields of science and art Altic s analysis also shows the incorporation of indigenous knowledge into the Jesuit maps effectively making them an expression of cross cultural communication even as they were tools of colonial expansion This ambiguity she reveals reflects the complex relationship between missions knowledge and empire Far more than just a physical survey of unknown space Jesuit mapping of the New World was in fact the most important link to enable an exchange of ideas and cultural concepts between the Old World and the New **The Oxford Handbook of the Jesuits**

Ines G. Županov,2019 Through its missionary pedagogical and scientific accomplishments the Society of Jesus known as the Jesuits became one of the first institutions with a truly global reach in practice and intention The Oxford Handbook of the Jesuits offers a critical assessment of the Order helping to chart new directions for research at a time when there is renewed interest in Jesuit studies In particular the Handbook examines their resilient dynamism and innovative spirit grounded in Catholic theology and Christian spirituality but also profoundly rooted in society and cultural institutions It also explores Jesuit contributions to education the arts politics and theology among others The volume is organized in seven major sections totaling forty articles on the Order s foundation and administration the theological underpinnings of its activities the Jesuit involvement with secular culture missiology the Order s contributions to the arts and sciences the suppression the Order endured in the 18th century and finally the restoration The volume also looks at the way the Jesuit Order is changing including becoming more non European and ethnically diverse with its members increasingly interested in engaging society in addition to traditional pastoral duties La Edad Media de Chile Gabriel Guarda O.S.B.,2016 La Edad Media de Chile

Abstract: Geohistorical sources among which are those of the cadastral and paracatastral type generally have greater heterogeneity and typological variety than in their current versions. Thus, research with geohistorical sources approached from multiple disciplines (Geography, History, Art, Anthropology, Environmental Sciences, Urban Planning, Architecture, Demography) represents a great boost for the analysis, knowledge and study of the territory, landscapes and society from a spatiotemporal perspective. This publication, with the title *Deep roots: A journey through geohistorical sources until the Enlightenment*, was born from the I International Congress of Geohistorical Sources. The territory and society in time will focus on relevant topics: the application of this type of sources in studies of various typologies; the methodological contributions or the generation of work standards applicable to cadastral and paracatastral sources from different areas and periods; didactics around geohistorical sources; the promotion of these sources through the use of new technologies in the field of Humanities and Social Sciences; the study and analysis of cadastral, paracatastral, statistical and cartographic documentation whose objective is to know the characteristics of the sources themselves and their contents, etc. In short, this scientific meeting and its subsequent publication in collaboration with the publishers of the University of Cantabria and the Autonomous University of Madrid has the objective of serving as a platform for researchers and technicians who are developing approaches about the purpose of each source, what ideological, political, social and economic circumstances motivated them, what their contents can be used for today, what data are collected and with what criteria they are aggregated and elaborated, what documents are prepared directly and indirectly and finally with what human resources, with what techniques they were built and with what technical, human and contextual resources they were developed.

Neotropical Mammals Salvador Mandujano, Eduardo J. Naranjo, Gabriel P. Andrade Ponce, 2023-11-01. This book reviews and synthesizes studies on local and regional occupancy and abundance of Neotropical mammals from central Mexico to South America. The book focuses primarily on addressing issues of a wide array of mammalian species from a population level in different habitats and ecosystems across the Neotropical region. Occupancy and abundance analyzed through hierarchical approaches with a variety of statistical tools are the central ecological parameters treated in the chapters of this volume. This book will be an updated reference for researchers, professionals, students, wildlife managers and people interested in mammal ecology and conservation in tropical and subtropical regions.

Enigmas de las Américas Sabrina Guerra Moscoso, Carla Lois, Bárbara

Polo Martín, Mauricio Onetto Pavez, Rodrigo Moreno Jeria, Guadalupe Pinzón Ríos, Kevin Bustillos, Lauren Beck, David Ramírez, 2021-05-26 La colección Enigmas de las Américas analiza expediciones de siglos pasados que buscaron descifrar enigmas de la geografía del continente americano. En cada libro especialistas internacionales escriben artículos donde analizan desde distintas perspectivas y diversos momentos el impacto de estas expediciones en la construcción de imaginarios y en la cartografía es decir en aquellos dispositivos visuales conocidos como mapas. El presente libro se enfoca en el esfuerzo por descifrar el enigma del paso interoceánico en diversos puntos de la geografía americana. De acuerdo con el lineamiento de la colección Enigmas de las Américas los artículos de este segundo libro abordan el impacto de la búsqueda del paso interoceánico en la cartografía reflejado en aquellos dispositivos visuales conocidos como mapas. Estos registran la información geográfica de las expediciones que en sus trayectos alcanzaron interesantes descubrimientos geográficos y etnográficos alentados por el anhelo continuo de encontrar en algún lugar de la inexplorada vastedad del Mar del Sur tierras llenas de impensables riquezas parte de aquella búsqueda inagotable. *Iglesia* Universidad de Buenos Aires.
