Missile Contagion Cruise Missile Proliferation And The Threat To International Security:

Missile Contagion Dennis M. Gormley, 2008-05-30 Most books on missile proliferation focus on the spread of ballistic missiles or cruise missiles not both Gormley's work however explains why cruise missiles are beginning to spread widely but does so by explaining their spread in the context of ballistic missile proliferation It therefore treats both ballistic and cruise missile proliferation as related phenomenon This work also focuses evenhandedly on both nonproliferation and defense policy including missile defenses and counterforce doctrines to fashion a set of integrated strategies for dealing with ballistic and cruise missile proliferation Signs of missile contagion abound In this study Gormley argues that a series of rapid and surprising developments since 2005 suggest that the proliferation of missiles capable of delivering either weapons of mass destruction or highly accurate conventional payloads is approaching a critical threshold The surprising fact is that land attack cruise missiles not ballistic missiles constitute the primary problem Flying under the radar both literally and figuratively land attack cruise missiles add a dangerous new dimension to protecting U S security interests and preventing regional military instability Gormley asserts that cruise missiles are not destined to supplant ballistic missiles rather they are likely to join them because when both are employed together they could severely test even the best missile defenses Worse yet Gormley argues land attack cruise missiles are increasingly being linked to preemptive strike doctrines which are fueling regional arms races and crisis instability This work explains why an epidemic of cruise missile proliferation long forecasted by analysts has only recently begun to occur After first assessing the state of ballistic missile proliferation Gormley explores the role of three factors in shaping the spread of cruise missiles These include specialized knowledge needed for missile development narrative messages about reasons for acquiring cruise missiles and norms of state behavior about missile nonproliferation policy and defense doctrine This book then addresses the policy adjustments needed to stanch the spread of cruise missiles in the first place or barring that cope militarily with a more demanding missile threat consisting of both cruise and ballistic missiles *Missile Contagion* Dennis M. Arms Control and Missile Proliferation in the Middle East Bernd Kubbig, Sven-Eric Fikenscher, 2012-03-29 This edited volume provides a systematic analysis of the missile threat and proliferation issue in the Middle East region The question of how to increase the level of security in the Middle East is not a new one given the conflict ridden nature of the region The solution attempted for this predicament has typically revolved around intense arms build ups a strategy which can prove self defeating due to the subsequent countermeasures employed by neighbouring states Arms Control and Missile Proliferation in the Middle East focuses on the strategic proliferation of arms with a specific emphasis on missiles This unique emphasis enables the contributors to provide a dynamic new perspective on conceptual and political disarmament efforts thereby distinguishing this volume from many other related works on the region which deal mainly with weapons of mass destruction The book also explores the possibility of a reduction in weapon arsenals examining a more promising cooperative security

concept which includes confidence and security building measures CSBMs This book will be of much interest to students of arms control Middle Eastern politics Gulf Security war and conflict studies security studies and IR The Consequences of American Nuclear Disarmament Christine M. Leah, 2017-02-18 This book is about the future of nuclear weapons geopolitics and strategy It examines the legacy of nuclear weapons on US thinking about some concepts of strategy and geopolitics namely deterrence extended deterrence alliances and arms control The purpose of this is to demonstrate just how fundamentally nuclear weapons have influenced American thinking about these concepts It argues that given the extent of nuclear weapons influence on these concepts and the implications for international security further reductions beyond current Strategic Arms Reduction Talks START levels and the more absolute idea of nuclear disarmament may not necessarily be prudent ideas Nuclear weapons have contributed to the avoidance of major war between states made alliances more credible and last longer and have made arms control relatively easier to conceptualize and manage As such the author argues these concepts may become even more difficult to manage in a world where nuclear weapons are marginalized A Global History of the Nuclear Arms Race Richard Dean Burns, Joseph M. Siracusa, 2013-04-23 Written by two preeminent authors in the field this book provides an accessible global narrative of the nuclear arms race since 1945 that focuses on the roles of key scientists military chiefs and political leaders The first book of its kind to provide a global perspective of the arms race this two volume work connects episodes worldwide involving nuclear weapons in a comprehensive narrative fashion Beginning with a discussion of the scientific research of the 1930s and 1940s and the Hiroshima decision the authors focus on five basic themes political dimensions technological developments military and diplomatic strategies and impact The history of the international nuclear arms race is examined within the context of four historical eras America's nuclear monopoly America's nuclear superiority superpower parity and the post Cold War era Information about the historical development of the independent deterrence of Britain France and China as well as the piecemeal deterrence of newcomers Israel India Pakistan and North Korea is also included as is coverage of the efforts aimed at the international control of nuclear weapons and the diplomatic architecture that underpins the global nuclear non proliferation regime Handbook of Military and Defense Operations Research Natalie M. best practices unique to the military security and national defense problem space Highlights similarities and dichotomies between analyses and trends that are unique to military security and defense problems Asian Defence Review 2013 Air Marshal Vinod Patney, 2014-03-15 Going by all estimates this is going to be an Asia centred century Indeed a shift of global power is under way from West to East The rise of China and India the recovery and resurgence of Russia on one side and Japan on the other and the nature of the international order are leading to enormous changes These transformational changes in the military economic social and political dynamics of Asia will only accelerate with the passage of time Historically changes in the international order and equations of power among nations have been almost inevitably accompanied by conflicts and wars The challenge ahead therefore for the international community in general and the Asian countries in particular is to ensure that this is avoided and competition which is inevitable is managed without escalating to the level of armed conflict This is crucial for most countries and especially so for India so that its pursuit of comprehensive national development can progress without adverse distractions In order to work toward such goals it is necessary to look at security and military related issues as objectively as possible It is with this objective in view that the Centre for Air Power Studies has been bringing out the Asian Defence Review This volume a resource base for both the professional and the general readers is the eighth in the series under this title which aims to fill a critical information and knowledge gap in current strategic literature dealing with military strategy defence politics and trends in military capabilities that impact countries in Asia In particular it covers some of the important issues that affect the Asian countries including those related to air power outer space Pakistan China cruise missiles and sea based deterrence Bombing to Provoke Jaganath Sankaran, 2024-10-24 The influence of aerospace weapons on the battlefield is felt profoundly yet the mechanism of coercion by which these weapons alter the will of the adversary is poorly understood This book argues that it is not what these weapons physically do but how they weaponize fear and trigger a sense of defenselessness that matters for understanding their coercive effect For anyone seeking to understand why states at war in the age of aerospace weapon warfare operate and react in the ways that they do this book's methodical dissection of the strategic rationale behind these weapons makes it necessary reading The U.S. Navy and the Rise of Great Power Competition James J. Wirtz, Jeffrey E. Kline, James A. Russell, 2023-12-22 This volume describes how technological and geo political trends are rapidly transforming maritime affairs A mix of original and previously published material this volume describes how the 21st century great power competition is changing the face of naval operations in general and U S Navy operations in the Western Pacific in particular The rise of an assertive China and its new anti access and area denial capabilities threaten the aircraft carrier based maritime dominance of the U S Navy Military and political trends in the Western Pacific and beyond suggest that the world is encountering a pivotal moment when existing weapons tactics and operations might be rendered obsolete by techno strategic change This volume considers these developments from three perspectives by describing 1 the techno strategic setting 2 the

institutional constraints that impede the ability of the U S Navy to respond to these changes and 3 a new approach to naval force planning and strategy to cope with these developments The volume culminates in a discussion of sophisticated strategies and operational concepts that position the U S Navy and its maritime allies and partners to prevail in today s techno strategic churn This book will be of much interest to students of naval policy strategic studies Asia Pacific politics and International Relations **Emerging Critical Technologies and Security in the Asia-Pacific** R. Bitzinger,2016-04-12

The proliferation of advanced militarily relevant technologies in the Asia Pacific over the past few decades has been a significant and perhaps even alarming development This volume addresses how such technologies may affect military capabilities and military advantage in the region *Emerging Technologies and International Stability* Todd S. Sechser,Neil Narang,Caitlin Talmadge,2021-11-28 Technology has always played a central role in international politics it shapes the ways states fight during wartime and compete during peacetime Today rapid advancements have contributed to a widespread sense that the world is again on the precipice of a new technological era Emerging technologies have inspired much speculative commentary but academic scholarship can improve the discussion with disciplined theory building and rigorous empirics This book aims to contribute to the debate by exploring the role of technology both military and non military in shaping international security Specifically the contributors to this edited volume aim to generate new theoretical insights into the relationship between technology and strategic stability test them with sound empirical methods and derive their implications for the coming technological age This book is very novel in its approach It covers a wide range of technologies both old and new rather than emphasizing a single technology Furthermore this volume looks at how new technologies might affect the broader dynamics of the international system rather than limiting the focus to a stability The contributions to this volume walk readers through the likely effects of emerging technologies at each phase of the conflict process The chapters begin with competition in peacetime move to deterrence and coercion and then explore the dynamics of crises the outbreak of conflict and war escalation in an environment of emerging technologies The chapters in this book except for the Introduction and the Conclusion were originally published in the Journal of Strategic Studies Complex Air Defense Tom Karako,Masao Dahlgren,2022-05-01 In the past five years Russia China and others have accelerated their development of hypersonic missiles to threaten U S forces in the homeland and abroad The current Ballistic Missile Defense System largely equipped to contend with legacy ballistic missile threats must be adapted to this challenge The same characteristics that make hypersonic missiles attractive may also hold the key to defeating them This CSIS report argues how a new hypersonic defense architecture should exploit hypersonic weapons unique vulnerabilities and employ new capabilities such as a space sensor layer to secure critical nodes These changes are not only necessary to mitigate the hypersonic threat but to defeat an emerging generation of maneuvering missiles and aerial threats **Still the Century of Overkill?** Paolo Foradori,2015-03-26 Weapons of mass destruction and their means are still considered by many countries as necessary or at

least desirable This collection of essays by leading scholars considers some of the key issues that affect the continued presence and proliferation of weapons of mass destruction in the world today **The Cold War** Spencer C.

Tucker,2020-10-27 This sweeping reference work covers every aspect of the Cold War from its ignition in the ashes of World War II through the Berlin Wall and the Cuban Missile Crisis to the collapse of the Soviet Union in 1991 The Cold War superpower face off between the Soviet Union and the United States dominated international affairs in the second half of the 20th century and still reverberates around the world today This comprehensive and insightful multivolume set provides authoritative entries on all aspects of this world changing event including wars new military technologies diplomatic initiatives espionage activities important individuals and organizations economic developments societal and cultural events and more This expansive coverage provides readers with the necessary context to understand the many facets of this complex conflict The work begins with a preface and introduction and then offers illuminating introductory essays on the origins and course of the Cold War which are followed by some 1 500 entries on key individuals wars battles weapons systems diplomacy politics economics and art and culture Each entry has cross references and a list of books for further reading The text includes more than 100 key primary source documents a detailed chronology a glossary and a selective bibliography Numerous illustrations and maps are inset throughout to provide additional context to the material **The China-India Nuclear Crossroads** Lora Saalman,2012-08-10 Global power is shifting to Asia The U S military is embarking on an American pivot to the Indo Pacific region and the bulk of global arms spending is directed toward Asian theaters India and Pakistan are thought to be building up their nuclear arsenals while questions persist about China s potential to sprint to parity China remains by far the world s largest market for new nuclear energy production and India aspires to be on a similar trajectory Despite these trends The China India Nuclear Crossroads is the first serious book by leading Chinese and Indian experts to examine the political military and technical factors that affect Sino Indian nuclear relations In this book editor and translator Lora Saalman presents a comprehensive framework through which China and India can pursue enhanced cooperation and minimize the unintended consequences of their security dilemmas **The Politics of Nuclear Weapons**

Turkey's Nuclear Future Sinan Ülgen, George Perkovich, 2015-03-24 Turkey with a robust modern economy and growing energy needs is pursuing a switch to nuclear power But that shift is occurring in an environment fraught with security challenges Turkey borders Iraq Syria and Iran all states with nuclear or WMD ambitions or capabilities As a NATO member Turkey also hosts U S nuclear bombs on its territory although some question the durability of this relationship This dynamic has naturally led to speculation that Turkish leaders might someday consider moving beyond a civilian course to develop nuclear weapons Yet there has been remarkably little informed analysis and debate on Turkey's nuclear future either within the country or in broader international society This volume explores the current status and trajectory of Turkey's nuclear program adding historical perspective analytical rigor and strategic insight
