New Product Development New Product Development:

New Product Development Tim Jones, 1997 New Product Development presents a unique cross discipline approach to new product development and goes further than most product design books by drawing together the various strands that make up total design now the accepted way to develop new products The successful development of new products has become a complex process involving contributions from a range of different disciplines Rarely is one individual responsible for the inception creation and realisation of a new product for today the inherent complexity of products markets and the processes through which they are developed dictates that a number of functions each with their own roles work together to create the product This book presents a cross discipline discussion of new product development its organisation its management the key stages and key functions involved Through the use of six major case studies and numerous mini cases the author demonstrates how a number of manufacturing companies have successfully illustrated separate elements into the new product development process Extensive use of photographs Includes case studies of Rover Flymo Logitech and Polaroid Provides a balanced overview of an often misunderstood process

New Product Development Scott J. Edgett, Rachel Brill, 2011 *Lean, Rapid and Profitable New Product Development* Robert G. Cooper, Scott J. Edgett, 2009-03-06 Although many companies have introduced product innovation processes they are still struggling to achieve the financial results they expected This book shows how to properly balance the need for speed with the drive for profitability It demonstrates how to maximize the value of a new product portfolio how to streamline the product innovation process and how to achieve growth that is both profitable and sustainable New product success is not simply about developing new products that sell it s about getting them to market quickly with the lowest cost and the highest return Dr Robert G Cooper and Dr Scott J Edgett use their latest research and draw upon their combined 60 years of experience in the field to show you what the companies that continuously win at new products are doing Top performers have discovered how to properly balance the need for speed with profitability With a new process they call NexGen TM Stage Gate R Dr Cooper and Dr Edgett show precisely how you can ensure that your innovation is not only lean and rapid but profitable as well For more information visit www.stagegate.com

New Product Development George Gruenwald, 1985 Author is an alumnus of Evanston Township High School class of 1940 [Revolutionizing Product Development](#) Steven C. Wheelwright, Kim B. Clark, 1992-06-15 Today a company s capability to conceive and design quality prototypes and bring a variety of superior products to market quicker than its competitors is increasingly the focal point of competition contend leading product development experts Steven Wheelwright and Kim Clark Drawing on six years of in depth systematic worldwide research they present proven principles for developing the critical capabilities for speed efficiency and quality that have worked again and again in scores of successful Japanese American and European fast cycle firms The authors argue that to survive let alone succeed today s companies must construct a new platform with new methodologies on which they can compete Using their model for development strategies

Wheelwright and Clark show that firms can create a solid architecture for the integration of marketing manufacturing and design functions for problem solving and fast action particularly during the critical design build test cycles of prototype creation They demonstrate further how successful firms such as Honda in automobiles Compaq in personal computers Applied Materials in semi conductors Sony in audio equipment The Limited in apparel and Hill Rom in hospital beds have employed recent methodologies to bring new products to market at break neck speed Such innovations include design for manufacturability quality function deployment computer aided design and computer aided engineering Finally Wheelwright and Clark emphasize the importance of learning in the organization Companies that consistently design it right the first time and follow a path of continuous improvement in product and process development have a formidable edge in the crucial race to market
