New Mexico Biology End Of Course Exam:

Meeting the Challenges to Measurement in an Era of Accountability Henry Braun, 2016-01-29 Under pressure and support from the federal government states have increasingly turned to indicators based on student test scores to evaluate teachers and schools as well as students themselves The focus thus far has been on test scores in those subject areas where there is a sequence of consecutive tests such as in mathematics or English language arts with a focus on grades 4-8 Teachers in these subject areas however constitute less than thirty percent of the teacher workforce in a district Comparatively little has been written about the measurement of achievement in the other grades and subjects This volume seeks to remedy this imbalance by focusing on the assessment of student achievement in a broad range of grade levels and subject areas with particular attention to their use in the evaluation of teachers and schools in all It addresses traditional end of course tests as well as alternative measures such as portfolios exhibitions and student learning objectives In each case issues related to design and development psychometric considerations and validity challenges are covered from both a generic and a content specific perspective The NCME Applications of Educational Measurement and Assessment series includes edited volumes designed to inform research based applications of educational measurement and assessment Edited by leading experts these books are comprehensive and practical resources on the latest developments in the field The Open Access version of this book available at <http://www.taylorfrancis.com> has been made available under a Creative Commons Attribution Non Commercial No Derivatives 4.0 license

Science Assessment in the Service of Reform Gerald Kulm, Shirley M. Malcom, 1991 Students in America don't measure up in science and mathematics a problem especially critical in a society which is becoming increasingly technology based This authoritative examination of the problem presents useful material to make assessment a tool for the meaningful reform of school science It also provides some basic guidelines for whatever system of assessment is used Acidic paper Annotation copyrighted by Book News Inc Portland OR

Conservation Assessment of the Sacramento Mountain Salamander Cynthia A.

Ramotnik,1997 This document synthesizes existing information on the Sacramento Mountain salamander a terrestrial amphibian endemic to three mountain ranges in southern New Mexico The salamander is found in mixed conifer forests primarily on USDA Forest Service lands within and under decayed logs and beneath rocks and litter Because the salamander depends on a moist microhabitat it is vulnerable to actions that directly or indirectly reduce the amount of moisture available to it This assessment will assist land managers in making informed evaluatinos regarding consequences of management decisions and guide them toward a coordinated approach in the context of ecosystem management
