Education and Social Sciences and related areas The Second Language Acquisition of French Tense, Aspect, Mood and Modality Dalila Ayoun, 2013-07-04 Temporal aspectual systems have a great potential of informing our understanding of the developing competence of second language learners So far the vast majority of empirical studies investigating L2 acquisition have largely focused on past temporality neglecting the acquisition of the expression of the present and future temporalities with rare exceptions aside from ESL learners leaving unanswered the question of how the investigation of different types of temporality may inform our understanding of the acquisition of temporal aspectual and mood systems as a whole This monograph addresses this question by focusing on three main objectives a to contribute to the already impressive body of research in the L2 acquisition of tense aspect and mood modality from a generative perspective and in so doing to present a more complete picture of the processes of L2 acquisition in general b to bridge the gap between linguistic theory and L2 acquisition c to make empirical findings more accessible to language instructors by proposing concrete pedagogical applications **The Multilingual Lexicon** Jasone Cenoz, Britta Hufeisen, U. Jessner, 2007-05-28 This book is unique because it explores the multilingual lexicon by providing insights from research studies conducted in psycholinguistics applied linguistics and neurolinguistics It goes beyond the use of two languages and thus concentrates on a new and developing area in linguistic research The different perspectives provide a link to the mainstream work on the lexicon and vocabulary acquisition and will stimulate further debate in these areas and in the study of multilingualism Multilingualism Larissa Aronin, David Singleton, 2012 Offers an account of multilingualism a phenomenon affecting a vast number of communities thousands of languages and millions of language users This book focuses on the knowledge and use of multiple languages It deals with both bilingualism and polyglottism at the level of the individual speaker as well as at the societal level
