From Charity to Justice Vincent Fang, 2021-05-03 This book focuses on the ethical demands of extreme poverty and develops a political theory of practical change Welding together political realism and moral aspirations it argues that a re imagined form of

development NGO can help the global North break free from the dominant and persistent charity paradigm and drift towards a justice based understanding of extreme poverty It offers an original explanation of why the charity paradigm persists and why the justice not charity messages from development NGOs have changed few minds The author argues that anyone concerned with a paradigm shift from charity to justice need to radically rethink the problem of political communication who should communicate what messages about extreme poverty in what ways Based on a rational choice critique of the competitive development NGO sector the author calls for sector wide reform and the emergence of a new political agent the Avant garde NGO which transcends the charity frame that NGOs currently find themselves locked in Further inspired by literary theory and social psychology he offers a fresh account of how the Avant garde NGO could through reflective public engagement induce attitude change and lead genuine social and political reform

Relative Effectiveness of Alternative Microfinance-driven Poverty Alleviation Programs in Bangladesh Dr. Tamgid Ahmed Chowdhury, 2014-06-26 In general the effectiveness of microfinance driven poverty alleviation programs run by Government Organizations GOs and Non Government Organizations NGOs in developing countries such as Bangladesh is assessed by repayment rates the number of beneficiaries the area coverage the amount of loans disbursed the cost of operations profitability and the financial sustainability of the projects This study argues that these methods are quite restrictive since none of them reflect the perceptions of poor people concerning the effectiveness of such projects Development agencies such as GOs and NGOs have never been compared on the basis of service delivery effectiveness a process based comparison nor have they ever been compared on the basis of their relative contribution to raising the living standards of the poor an outcome based comparison Both types of comparison are crucial to poverty reduction The main reason behind the absence of such comparisons is the unavailability of the appropriate parameters that could be used for such analysis For the process based comparison this study develops and validates a two dimensional multi item service delivery effectiveness scale through construct convergent discriminant and nomological validity The scale captures different aspects of effectiveness in the delivery of services These aspects are termed the credibility dimension and the focus towards beneficiaries dimension of service delivery in poverty alleviation programs For the output based comparison this study also develops and validates a multidimensional poverty model to compare the effectiveness of GOs and NGOs in contributing to the economic social political and cultural elements in the lives of the poor The methodology is based on 930 samples collected from 12 districts and 107 randomly chosen villages in Bangladesh during September December 2009
