### **Database and Expert Systems Applications** Heinrich C. Mayr, Jiri Lazansky, Gerald Quirchmayr, Pavel

Vogel, 2003-06-29 th DEXA 2001 the 12 International Conference on Database and Expert Systems Applications was held on September 3-5 2001 at the Technical University of Munich Germany. The rapidly growing spectrum of database applications has led to the establishment of more specialized discussion platforms: DaWaK conference, EC Web conference and DEXA workshop, which were all held in parallel with the DEXA conference in Munich. In your hands are the results of much effort beginning with the preparation of the submitted papers. The papers then passed through the reviewing process and the accepted papers were revised to final versions by their authors and arranged with the conference program. All this culminated in the conference itself. A total of 175 papers were submitted to this conference and I would like to thank all the authors. They are the real base of the conference. The program committee and the supporting reviewers produced altogether 497 referee reports on average of 2.84 reports per paper and selected 93 papers for presentation. Comparing the weight or more precisely the number of papers devoted to particular topics at several recent DEXA conferences, an increase can be recognized in the areas of XMS, databases, active databases and multi and hypermedia efforts. The space devoted to the more classical topics such as information retrieval, distribution and Web aspects and transaction indexing and query aspects has remained more or less unchanged. Some decrease is visible for object orientation. *Database Systems for Advanced*

*Applications* Kian Lee Tan, Vilas Wuwongse, 2006-04-05 This book constitutes the refereed proceedings of the 11th International Conference on Database Systems for Advanced Applications DASFAA 2006 held in Singapore in April 2006. 46 revised full papers and 16 revised short papers presented were carefully reviewed and selected from 188 submissions. Topics include sensor networks, subsequence matching and repeating patterns, spatial temporal databases, data mining, XML compression and indexing, xpath query evaluation, uncertainty and streams, peer to peer and distributed networks and more.

*The World Wide Web and Databases* Dan Suciu, 2001-03-14 This book constitutes the thoroughly refereed post proceedings of the Third International Workshop on the World Wide Web and Databases WebDB 2000 held in Dallas Texas USA in May 2000. The 16 revised full papers presented together with one invited paper were carefully reviewed and selected after two rounds of reviewing and revision from a total of 69 initial submissions. The papers are organized in topical sections on information gathering, caching, querying in XML, XML structuring and versioning, web modeling, query processing and classification and retrieval. *Proceedings of the Fifth Symposium on Software Reusability, SSR'99*, 1999 *Advances in*

*Databases and Information Systems* Yannis Manolopoulos, Jaroslav Pokorný, Timos Sellis, 2006-08-29 This book constitutes the refereed proceedings of the 10th East European Conference on Advances in Databases and Information Systems ADBIS 2006. The book presents 29 high quality papers selected in a rigorous reviewing process. The papers address a wide range of hot research issues and are organized in topical sections on XML databases and semantic web, web information systems and

middleware query processing and indexing modelling and design issues and more

Yannis Papakonstantinou,2012-09-15 Modern web applications offer elegant and intuitive interfaces to data driven business processes but the power of such Web 2.0 data driven applications comes at an increased development and maintenance cost. Technologies such as web service APIs rich JavaScript HTML5 components and disparate mobile and tablet platforms require many lines of glue code to interface between multiple layers, sub systems and languages. This book provides web architects and developers with clean Model View Controller patterns along with valuable information on technologies that reduce interfacing code between layers. Together these patterns and technologies lead to rapid development modular applications and effective code management.

**Advanced Applications and Structures in XML Processing: Label Streams, Semantics Utilization and Data Query Technologies** Li, Changqing, Ling, Tok Wang,2010-02-28 This book is for professionals and researchers working in the field of XML in various disciplines who want to improve their understanding of the XML data management technologies such as XML models XML query and update processing XML query languages and their implementations keywords search in XML documents database web service publish subscribe medical information science and e business. *Data Management for Multimedia Retrieval* K. Selçuk Candan, Maria Luisa Sapino,2010-05-31 Multimedia data require specialised management techniques because the representations of colour time semantic concepts and other underlying information can be drastically different from one another. This textbook on multimedia data management techniques gives a unified perspective on retrieval efficiency and effectiveness. It provides a comprehensive treatment from basic to advanced concepts that will be useful to readers of different levels from advanced undergraduate and graduate students to researchers and to professionals. After introducing models for multimedia data images video audio text and web and for their features such as colour texture shape and time the book presents data structures and algorithms that help store index cluster classify and access common data representations. The authors also introduce techniques such as relevance feedback and collaborative filtering for bridging the semantic gap and present the applications of these to emerging topics including web and social networking.
