Nice Private Enforcement Before National Courts:

Standing to Enforce European Union Law before National Courts Hilde K Ellingsen, 2021-03-25 Access to court has long been recognised as an essential element of a Union based on the rule of law This book asks how can Member States ensure that their rules on standing guarantee that right The book answers this question by analysing the requirements of EU law from two angles first the effective protection of Union rights second the effectiveness of Union law per se With detailed case law examination the book formulates an autonomous Union law doctrine of standing based on the principle of effective judicial protection It then goes further setting out an effectiveness test of Member States enforcement mechanisms to ensure that EU law is rendered operative in practice This is a rigorous study on a question of immense importance

Eurolegalism R. Daniel Kelemen, 2011-04-01 Despite western Europe's traditional disdain for the United States adversarial legalism the European Union is shifting toward a similar approach to the law according to Daniel Kelemen Coining the term eurolegalism to describe the hybrid he shows how the political and organizational realities of the EU make this shift inevitable The Effectiveness of the Köbler Liability in National Courts Zsófia Varga, 2020-10-15 Over the last 15 years Köbler liability has resulted in the allocation of damages on only five occasions Why is that And what are the practical implications of the Köbler judgment in the Member States This book offers a unique analysis of the principle not from the usual EU focused point of view but from the view of the practical Member State and thus follows the track set by earlier books in the EU Law in the Member States series It thoroughly examines the national jurisprudential and legislative acceptance of the state liability principle and explores the existence of alternative remedies available in the Member States in case of such breaches The conclusions based on a systematic assessment of 300 national judgments from the 28 Member States lead to a reconsideration of the role of the Köbler doctrine in the system of judicial remedies against violation of EU law by national supreme courts After the pronouncement of the ECJ judgment in Köbler legal scholars and practitioners have forecast the eradication of the principle of res judicata and the endangering of judicial independence The judgment caused a lot of ink to flow according to the ECJ's records at least 100 studies are directly devoted to the analysis of this decision This book is however the first to offer a comprehensive analysis on the genuine life of the Köbler liability in the Member States
