Bwalya, 2018-12-01 This book brings out current research and practice concepts articulating the research agenda for e Government When e Government was first conceived it was designed upon basic technologies where the emphasis was only on the simple display of government information for citizens to read Nowadays e Government design comprises many complicated modules such as upload and download consoles two way interaction consoles between citizens and government agents integrated government business processes presenting the whole of government and it does not depend solely on technology The complexity of e Government has now evolved to include political cultural economic social and technical dimensions Bringing all these difficult aspects together is so complicated that it needs carefully planned strategies informed by local contextual characteristics Rather than giving formulaic definitions and conceptual standpoints on many aspects of e Government as is the case in many e Government publications this book will explore the frontiers of global knowledge value chains by discussing current and future dimensions of e Government For example the book discusses the concept of data governance by exploring how actual opening up of government data can be achieved especially in a developing world context Further the book posits that opening government data should be followed by the opening up of government business processes in order to peddle the concept of accountability and responsiveness Much text on data governance has concentrated on articulating the basic definitions surrounding this concept Another very important topic explored in this book is regarding how the concept of decolonisation can be extended to e Government by providing practical examples as to how researchers in the developing world can contribute to the advancement of e Government as a scientific field of enquiry and guide its implementation thereof Decolonisation is advocated for in e Government research so that there is a balance in the inclusion of the Afrocentric knowledge into e Government advancement other than over reliance on the Euro Asia and America centric knowledge value chains Mbembe 2015 As e Government is a very expensive undertaking the issue of funding has excluded African countries and a majority of the developing world from implementing e Government Despite funding being a critical cornerstone of e Government development there is a dearth of information on this topic Therefore this book provides a chapter which discusses traditional and innovative ways of funding e Government design and implementation which can go a long way in improving e Government penetration into the developing world Further the book explores how intelligent e Government applications can be designed especially in resource constrained countries A couple of emerging technology innovations such as fog computing and intelligent information technology are explored within the realm of e Government design

Agriculture for improved nutrition: Seizing the momentum Fan, Shenggen, Yosef, Sivan, Pandya-Lorch, Rajul, 2019-02-28

Agriculture's vast potential to improve nutrition is just beginning to be tapped. New ideas, research and initiatives developed over the past decade have created an opportunity for reimagining and redesigning agricultural and food systems for the benefit of nutrition. To support this transformation, the book reviews the latest findings, results from on-the-ground programs and interventions, and recent policy experiences from countries around the world that are bringing the agriculture and nutrition sectors closer together. Drawing on IFPRI's own work and that of the growing agriculture-nutrition community, this book strengthens the evidence base for and expands our vision of how agriculture can contribute to nutrition. Chapters cover an array of issues that link agriculture and nutrition, including food value chains, nutrition-sensitive programs and policies, government policies and private sector investments. By highlighting both achievements and setbacks, *Agriculture for Improved Nutrition* seeks to inspire those who want to scale up successes that can transform food systems and improve the nutrition of billions of people.

[Precision Medicine in Oncology](#) Angela Re, Caterina Nardella, Alessandro Quattrone, Andrea Lunardi, 2019-01-21

The emerging precision medicine approach aims to tailor disease prevention and treatment to each patient on the basis of individual variability, environmental factors and lifestyle. Fundamental achievements in the last few decades have converged to offer nowadays the compelling opportunity to move towards this innovative approach: i) unprecedented improvements in disease modeling *in silico*, *in vitro* and *in vivo*; ii) acquisition of a wide range of biomedical information combined with the development of computational toolsets for flexible and integrative analyses of multi-assay datasets. Our deeper understanding of oncogenic mechanisms has finally begun to have a crucial impact on clinical decisions at several steps from cancer prevention and diagnosis to therapeutic intervention. However, precision oncology still encounters several unresolved hurdles, including tumour heterogeneity and recurrence, as well as unexplained drug resistance and lack of effective ways to monitor response to therapeutic treatments. Notably, limitations in biomedical research regulation and governance represent additional debatable issues that need careful consideration.

[On the Brink of Utopia](#) Thomas Ramge, Rafael Laguna De La Vera, 2024-04-30

A new and coherent framework for fostering breakthrough innovations that we urgently need to confront our collective future. We live in less innovative times than we think. Despite having made major technological advancements in a few areas, we are still left with enormous unsolved challenges. A radical shift in the culture of innovation is needed. *On the Brink of Utopia* by authors Thomas Ramge and Rafael Laguna de la Vera and with a foreword written by Nobel Laureate Stefan Hell offers just that: a new and coherent framework for fostering breakthrough innovations for human progress. In their Innovation Leap Paradigm, they present seven steps in seven chapters and answer three simple questions: What great challenges need to be tackled? Who makes tech leaps? And finally, what political, economic and cultural

environments foster radical innovation The authors sketch out a future in which technology will solve real problems anywhere from climate change and hunger to obesity and menstrual pain They envision a future in which biotechnologists work from a platform that enables them to develop effective drugs within months for any emerging virus where green energy will be too cheap to meter and aerial carbon can be transmuted into a valuable commodity at scale Offering a new perspective on innovation that centers not just American readers but also readers from all over the world On the Brink of Utopia is a hopeful and visionary book that reimagines the roles of innovators citizens governments and financial markets to foster innovation leaps that maximize the well being of the greatest number of people     [Big Data - BigData 2018](#) Francis Y.
