Automatic enrolment in workplace pensions and the National Employment Savings Trust Great Britain: Parliament: House of Commons: Work and Pensions Committee, 2012-03-15 The Government established NEST as a low cost pension scheme to help deliver the auto enrolment programme and to address a market failure in the pensions industry which meant that many employers and employees were unable to access low cost good quality pension provision However the Committee believes that certain restrictions placed on NEST will create complexity for employers and will disadvantage some employees The Committee's report recommends that if state aid rules allow the Government should remove the following restrictions the cap on the annual contributions an individual can make to a NEST scheme and the ban on individuals transferring existing pension pots into NEST The Committee further urges the Government to proceed with its plans for State Pension reform introducing a flat rate State Pension and reducing the level of means testing without delay The report also highlights the difficulties and complexity employers and employees currently face in comparing the fees and charges applied by pension providers and recommends that from 2013 onwards if some auto enrolment schemes still have hidden charges or charges that represent poor value for money the Government should use its powers to intervene Auto enrolment will impose new costs and may be particularly challenging for small employers however the Committee considers that the Government has taken appropriate steps to minimise the impact on businesses through its gradual and flexible approach staging and phasing to implementation Exempting small employers would create significant complexity as well as excluding many employees from the benefits of workplace pension saving

The Economic Approach Gary S. Becker, Julio J. Elias, Kevin M. Murphy, 2023-08-16 A revealing collection from the intellectual titan whose work shaped the modern world As an economist and public intellectual Gary S Becker was a giant The recipient of a Nobel Prize a John Bates Clark Medal and a Presidential Medal of Freedom Becker is widely regarded as the greatest microeconomist in history After forty years at the University of Chicago Becker left a slew of unpublished writings that used an economic approach to human behavior analyzing such topics as preference formation rational indoctrination income inequality drugs and addiction and the economics of family These papers unveil the process and personality direct critical curious that made him a beloved figure in his field and beyond The Economic Approach examines these extant works as a capstone to the Becker oeuvre not because the works are perfect but because they offer an illuminating instructive glimpse into the machinations of an economist who wasn't motivated by publications Here and throughout his works an inquisitive spirit remains remarkable and forever resonant

Neo-statecraft and Meta-geopolitics Nayef R. F. Al-Rodhan, 2009 This book proposes an innovative and comprehensive framework for conducting statecraft in the 21st century Called neo statecraft this framework is based on the reconciliation of power interests and justice The author proposes four substrates of neo statecraft 1 a new structure he calls

meta geopolitics which includes seven inter related dimensions of state power and identifies a Geostrategic Tripwire Pivotal Corridor TPC 2 a sustainable national security paradigm that stresses the centrality of justice symbiotic realism and transcultural synergy 3 a new concept called just power which states that power must be smart as well as just and that global justice is above all a national interest of all states and 4 a new concept called reconciliation statecraft of the eight global interests Dr Nayef R F Al Rodhan is Senior Scholar in Geostrategy and Director of the Programme on the Geopolitical Implications of Globalisation and Transnational Security at the Geneva Centre for Security Policy Geneva Switzerland This book offers a refreshing and ambitious re examination of the nature of statecraft and geopolitics and contains a number of relevant concepts that can be translated into brand new research and ambitious policy goals Building on a number of his previous concepts the author continues a remarkable endeavour aimed at updating and adapting traditional geopolitical perceptions Step by step brick after brick the author is clearly building a major comprehensive contribution to strategic thinking and diplomacy Professor Francois Gere Director of Research at Paris 3 Sorbonne Nouvelle and President of the French Institute for Strategic Analysis IFAS Paris France This book provides a carefully crafted description of how the international system is being transformed and defines the challenges facing contemporary statecraft in handling that transformation Nayef Al Rodhan has undertaken this enormous task by defining the concept of meta geopolitics and addressing potential future problems while making full use of the analytical tools that he has developed It is a unique and intellectually courageous undertaking that will help us gain deeper insights into the many dimensions of current and future security challenges Ambassador Rolf Ekeus Chairman of the Stockholm International Peace Research Institute SIPRI Stockholm Sweden

Innovations and Challenges in Digital Literacies Rodney H. Jones, 2025-09-29

Innovations and Challenges in Digital Literacies questions whether the current theoretical frameworks and pedagogical practices around digital literacies are sufficient to confront the technological social and political crises around digital media that we are experiencing today Drawing on extensive research in digital literacies discourse analysis and sociotechnical systems Jones reimagines digital literacies not simply as skills for making meaning and navigating information but as a more holistic project of figuring out how to fix what is broken about the internet and our broader societies The book focuses on seven key sites of repair action attention affect affinity visibility truth and humanity each site offering insights into how agency emotions relationships knowledge and intelligence emerge through our entanglements with digital technologies The text aims to provoke debate about how we define digital literacies in an age of political polarisation and rapid technological change It provides powerful tools for teaching learning and living more ethically with digital media With this book Jones invites readers to see themselves not just as users of digital technology but as fixers of broken systems and caretakers of our increasingly fragile world This approach provides a framework for educators students and researchers to collaboratively develop practical strategies to challenge the logics of technological and social systems cultivating new literacies for an age of online

Parliament. House of Commons. Environment, Food and Rural Affairs Committee,2013 Against a background where farm incomes are falling the Government needs to recognise that cutting payments to England s farmers will reduce their ability to compete in the marketplace will leave farmers less able to invest in vital infrastructure and may make them more vulnerable to shocks such as poor weather higher input costs and price variations The Committee also warns against plans to transfer more money away from direct payments to farmers by shifting it towards environmental schemes It recommends that the Government maintains the current 9% rate of transfer away from the direct payment budget This rate of transfer should rise to 15% in 2017 only if it can demonstrate that additional funds are required and that this change will deliver a clear benefit Money should also only go to people who actually farm the land and meet an active farmer test From 2015 30% of the direct payment will be conditional on farmers achieving basic environmental measures A National Certification Scheme approach to greening does not offer the flexibility to avoid the Commission s impractical crop diversification rule so the Government is right to dismiss this approach A new single IT system is being developed and the Government want access to CAP funding to be digital by default meaning farmers will have to apply online A lot went wrong in the last round of changes and these problems gave rise to 580 million in penalties Does it make sense to introduce a new computer system at the same time as complex new payment rules
