James D. Westwood, 2008 We humans are tribal grouping ourselves by a multitude of criteria physical intellectual political emotional etc The Internet and its auxiliary technologies have enabled a novel dimension in tribal behavior during our recent past This growing connectivity begs the question will individuals and their communities come together to solve some very urgent global problems At MMVR we explore ways to harness information technology to solve healthcare problems and in the industrialized nations we are making progress In the developing world however things are more challenging Massive urban poverty fuels violence and misery Will global networking bring a convergence of individual and tribal problem solving Recently a barrel shaped water carrier that rolls along the ground was presented improving daily life for many people Also the One Laptop per Child project is a good example of how the industrialized nations can help the developing countries They produce durable and simple laptops which are inexpensive to produce At MMVR we focus on cutting edge medical technology which is generally pretty expensive While the benefits of innovation trickle downward from the privileged few to the broader masses we should expand this trickle into a flood Can breakthrough applications in stimulation visualization robotics and informatics engender tools as ingeniously as the water carrier or laptop With some extra creativity we can design better healthcare for the developing world too

#### **Recent Advances in Hip and Knee Arthroplasty**

Samo Fokter, 2012-01-27 The purpose of this book is to offer an exhaustive overview of the recent insights into the state of the art in most performed arthroplasties of large joints of lower extremities The treatment options in degenerative joint disease have evolved very quickly Many surgical procedures are quite different today than they were only five years ago In an effort to be comprehensive this book addresses hip arthroplasty with special emphasis on evolving minimally invasive surgical techniques Some challenging topics in hip arthroplasty are covered in an additional section Particular attention is given to different designs of knee endoprotheses and soft tissue balance Special situations in knee arthroplasty are covered in a special section Recent advances in computer technology created the possibility for the routine use of navigation in knee arthroplasty and this remarkable success is covered in depth as well Each chapter includes current philosophies techniques and an extensive review of the literature
