topography that enables research and investigation

Histories offers new empirical research which engages critically with key concepts in media history today *Architecture and the Image at the Turn of the 21st Century* Sanja Rodeš, 2024-06-28 This book examines architecture image and media relationships as productive for architecture and architectural discourses By arguing that the relationships between architecture and media cannot be dismissed via linear criticism of architecture and media or image these relations are instead seen as a part of a sphere a mediasphere of complex relationships In lieu of anything like a consensus on the contemporary condition of architecture referring to the late twentieth and the twenty first centuries the starting point of this book is that the relationships between architecture media and images continue to multiply owing to continuous technological advancements Contemporary architecture considered in this book is related to the selected circumstances of high visibility where architectural images are propelled into visibility and conflated with non architectural images This takes architecture outside of architectural only discourse and into the public realm By granting higher visibility to both the architectural images and architecture in the public realm architecture can also be influenced by the various perceptions of the general public and can enter public consciousness via non architectural media With increased visibility architecture s far reaching presence calls for more structured analysis of its nature and potential As the analysed architecture in this book is associated with the discourses outside of architecture some of which relate to terrorism natural disaster and branding and consumption the limits of contemporary architectural discipline are questioned and extended This book is written for academics and students in architectural history theory and criticism particularly those interested in visual and media studies **The Builders**

From Voice to Influence Danielle Allen, Jennifer S. Light, 2015-06-19 How have online protests like the recent outrage over the Komen Foundation s decision to defund Planned Parenthood changed the nature of political action How do Facebook and other popular social media platforms shape the conversation around current political issues The ways in which we gather information about current events and communicate it with others have been transformed by the rapid rise of digital media The political is no longer confined to the institutional and electoral arenas and that has profound implications for how we understand citizenship and political participation With *From Voice to Influence* Danielle Allen and Jennifer S Light have brought together a stellar group of political and social theorists social scientists and media analysts to explore this transformation Threading through the contributions is the notion of egalitarian participatory democracy and among the topics discussed are immigration rights activism the participatory potential of hip hop culture and the porous boundary between public and private space on social media The opportunities presented for political efficacy through digital media to people who otherwise might not be easily heard also raise a host of questions about how to define good participation Does the ease with which one can now participate in online petitions or conversations about current events seduce some away from serious civic activities into slacktivism Drawing on a diverse body of theory from Hannah Arendt to Anthony Appiah *From Voice to Influence* offers a range of distinctive visions for a political ethics to guide citizens in a digitally connected world

Media Archaeology and Intermedial Performance Nele Wynants, 2018-12-30 This book develops media archaeological approaches to theatre and intermediality As an age old art form theatre has always embraced new media To create theatrical effects and optical illusions theatre makers were ready to integrate state of the art technics and technologies and by doing so they playfully explored and popularized scientific knowledge on mechanics optics and sound for live audiences This book highlights this obvious but often overlooked relation between media developments and the history of intermedial theater By considering the interplay between present intermedial performances and their archaeological traces the authors assembled here revisit old and often forgotten media approaches and theatre technologies This archaeology is understood less as the discovery of a forgotten past than as the establishment of an active relationship between past and present Rather than treating archaeological remains as representative tokens of a fragmented past that need to be preserved the authors stress the return of the past in the present but in a different performative guise
