

# Pantera COWBOYS FROM HELL

**Dimebag's at his outlandish best on the title track of Pantera's brilliant *Cowboys From Hell***

**C**owboys From Hell was Pantera's first album, but the band's first with Phil Anselmo on vocals. The arrival of Anselmo marked the band's abandonment of their hair-metal status of the 80s, as the singer's vocals and the riffs became more intense, topped off by later albums *Far Beyond Driven* and *The Great Southern Burn*.

*Cowboys From Hell* the song contains enough riffs and great guitar playing to create several metal tracks and to get the best results you'll need a precise picking and a well-developed palm-muting technique. For this, the level of the picking hand must be positioned over the bridge enough to reduce string sustain and brightness, but not enough to over-mute it. The volume of picking throughout, as much of the riffing is based on 16th notes, although to create the right feel for the syncopated seven- and six-stroke should help you, place the low sixth string on the off-beats.

The solo at 2:27 is, as you'd probably expect from a player like Dimebag, quite frantic, so be sure to warm up with scales first before tackling it. This is good for both hands. The first most problematic area of the solo is the middle from the 10th fret and octuplets which spread across all six strings using the same fret (10th, 12th and 15th). It's a good fretting-hand exercise, so practice it slowly first, before increasing speed and also to play a down pick when you change to the next string. The second passage that requires precision and timing is the bar of octuplets at the 12th fret position (E minor triads bar) that come under name of Steve Morse's chromatic lead pentatonic lick. Start with a down pick on the second string and then use an up pick for the first note on the third string. This inside-picking approach is a little tricky (keep in mind this speed), but practice should sort it.

To recreate Dimebag's guitar

distortion, use a tube amp and feeling the effects of overdrive too much.

tone use a bridge humbucker. Dimebag insists on a Bill Lawrence high-output, thick-kick tone for his Texas Star Telecaster. Duncan and DiMarzio make powerful humbuckers too. Although Dimebag prefers Randall solid-state amps over tube amps, Ross Marshall for Mesa Boogie has guitar tone adds the modern metal approach, with the treble on full, bass on 3 and the mid on 10. This is commonly referred to as the 'scooped' metal tone, as

the mids and frequencies (usually around 1-1.5kHz) are reduced to a minimum and the bass and treble increased. You may like to add some mid EQ for the solo, so it cuts through more and gives a thicker sound to augment punch. For mids and seeing sustained high notes, we used a Line 6 POD on its Rectifier setting for the riffs and solo and for the very final riff we used a V30 Overdrive manager plug-in, but any manager effect will work equally as well.

albums featuring vocalist Terry Glaze were glam metal records heavily influenced by bands such as Van Halen and Kiss. Having dropped Terry Glaze and welcoming vocalist Phil Anselmo in 1987, Pantera moved away from the glam inspired music with their fourth studio album *Power Metal* in 1988. In 1989 the band signed with Atlantic Records subsidiary label Atco Records, having impressed Atco representative Mark Ross. The band began work on their major label debut at Pantego Sound Studio in Pantego, Texas, and in the following year they released *Cowboys from Hell* in 1990. The album was a key turning point for Pantera, demonstrating a change in the band's musical direction which was focused on bands such as Slayer, Metallica, and Black Sabbath. After the release of *Cowboys from Hell*, Pantera released *Reinventing Hell: Best Of Pantera* in 2003.
