

The Case of the Parabolic Pool Table

The Problem

The problem was that the pool table was not level. The customer had purchased a pool table from a local pool hall and was having trouble getting the balls to roll straight. The pool hall owner had told the customer that the table was level, but the customer was not satisfied. The customer had contacted several other pool halls, but none of them could solve the problem. The customer was frustrated and had decided to contact us for help.

Our Four Tables

Solution

The solution was to level the pool table. We used a special tool to measure the table and found that it was not level. We then used a special technique to level the table. The customer was very happy with the results and has since purchased another pool table from us.
