Paradigm Wars Indigenous Peoples Resistance To Globalization:

Paradigm Wars Jerry Mander, Victoria Tauli-Corpuz, 2006 In this spirited book best selling author Jerry Mander partners with one of the world's most celebrated indigenous leaders Victoria Tauli Corpuz to gather powerful firsthand reports on a momentous collision of worldviews that pits the forces of economic globalization against the Earth's indigenous peoples. With many of the planet's remaining natural resources on indigenous lands traditional indigenous practices of biodiversity preservation have ironically made these lands targets for global corporations seeking the last forests genetic and plant materials oil and minerals to feed their unsustainable growth. Corporate invaders often employ military force as well as harsh pressures from the World Bank IMF and WTO. But native peoples refuse to be victims. Their stories of resistance and growing success are inspirational. Book jacket *Paradigm Wars*, 2005 *The UN Declaration on the Rights of Indigenous Peoples* Jessie Hohmann, Marc Weller, 2018 The rights of indigenous peoples under international law have seen significant change in recent years as various international bodies have attempted to address the question of how best to protect and enforce their rights. The United Nations Declaration on the Rights of Indigenous Peoples is the strongest statement thus far by the international community on this issue. The Declaration was adopted by the United Nations on 13 September 2007 and sets out the individual and collective rights of indigenous peoples as well as their rights to culture identity language employment health education and other issues. While it is not a legally binding instrument under international law it represents the development of international legal norms designed to eliminate human rights violations against indigenous peoples and to help them in combating discrimination and marginalisation. This comprehensive commentary on the Declaration analyses in detail both the substantive content of the Declaration and the position of the Declaration within existing international law. It considers the background to the text of every Article of the Declaration including the travaux préparatoire the relevant drafting history and the context in which the provision came to be included in the Declaration. It sets out each provision's content interpretation its relationship with other principles of international law and its legal status. It also discusses the significance and outlook for each of the rights analysed. The book assesses the practice of relevant regional and international bodies in enforcing the rights of indigenous peoples providing an understanding of the practical application of the Declaration's principles. It is an indispensable resource for scholars students international organisations and NGOs working on the rights of indigenous peoples. **The SAGE Handbook of Globalization** Manfred Steger, Paul Battersby, Joseph Siracusa, 2014-05-22 Global studies is a fresh and dynamic discipline area that promises to reinvigorate undergraduate and postgraduate education in the social sciences and humanities. In the Australian context the interdisciplinary pedagogy that defines global studies is gaining wider acceptance as a coherent and necessary approach to the study of global change. Through the Global Studies Consortium GSC this new discipline is forming around an impressive body of international scholars who define their expertise in global terms. The GSC paves the way for the expansion of global studies programs.

internationally and for the development of teaching and research collaboration on a global scale Mark Juergensmeyer and Helmut Anheier's forthcoming Encyclopaedia of Global Studies with SAGE is evidence of this growing international collaboration while the work of Professor Manfred Steger exemplifies the flourishing academic literature on globalization RMIT University's Global Cities Institute represents a substantial institutional investment in interdisciplinary research into the social and environmental implications of globalization in which it leads the way internationally Given these developments the time is right for a book series that draws together diverse scholarship in global studies This Handbook allows for extended treatment of critical issues that are of major interest to researchers and students in this emerging field The topics covered speak to an interdisciplinary approach to the study of global issues that reaches well beyond the confines of international relations and political science to encompass sociology anthropology history media and cultural studies economics and governance environmental sustainability international law and criminal justice Specially commissioned chapters explore diverse subjects from a global vantage point and all deliberately cohere around core global concerns of narrative praxis space and place This integrated approach sets the Handbook apart from its competitors and distinguishes Global Studies as the most equipped academic discipline with which to address the scope and pace of global change in the 21st century
