*Choosing Daughters* Lihong Shi,2017-08-08 China s patrilineal and patriarchal tradition has encouraged a long standing preference for male heirs within families Coupled with China s birth planning policy this has led to a severe gender imbalance But a counterpattern is emerging in rural China

where a noticeable proportion of young couples have willingly accepted having a single daughter. They are doing so even as birth planning policies are being relaxed and having a second child and the opportunity of having a son is a new possibility. *Choosing Daughters* explores this critical yet largely overlooked reproductive pattern emerging in China's demographic landscape. Lihong Shi delves into the social, economic, and cultural forces behind the complex decision-making process of these couples to unravel their life goals and childrearing aspirations, the changing family dynamics and gender relations, and the intimate parent-daughter ties that have engendered this drastic transformation of reproductive choice. She reveals a leading edge social force that fosters China's recent fertility decline, namely, pursuit of a modern family and successful childrearing achieved through having a small family. Through this discussion, Shi refutes the conventional understanding of a universal preference for sons and discrimination against daughters in China and counters claims of continuing resistance against China's population control program.

[Parenting, Family Policy and Children's Well-Being in an Unequal Society](#) D. Hartas,2014-01-30 Western societies face many challenges The growing inequality and the diminishing role of the welfare state and the rapid accumulation of the resources of a finite planet at the top 1% have made the world an inhospitable place to many families Parents are left alone to deal with the big societal problems and reverse their impact on their children s educational achievement and life chances The average working family is sliding down the social ladder with a significant impact on children s learning and wellbeing We now know that parental involvement with children s learning although important in its own right is not the primary mechanism through which poverty translates to underachievement and reduced social mobility Far more relevant to children s learning and emotional wellbeing is their parents income and educational qualifications The mantra of what parents do matters is hypocritical considering the strong influence that poverty has on parents and children We can no longer argue that

we live in a classless society especially as it becomes clear that most governmental reforms are class based and affect poor families disproportionately In this book Dimitra Hartas explores parenting and its influence on children s learning and wellbeing while examining the impact of social class amidst policy initiatives to eradicate child poverty in 21st Century Britain
