Hylton, 2010-01-01 In this outstanding new book Professor Keith Hylton and his collaborators examine what antitrust law has become over the past ten years a time in which economic analysis has become its undisputed core What has become of the old antitrust doctrine what are the new issues for the immediate future This book brings together the leading experts to examine this silent revolution at the core of US domestic policy Mark Grady UCLA School of Law US Hylton s Antitrust Law and Economics brings together many of the best authors writing in antitrust today Their essays range widely covering proof of agreement under the Sherman Act group boycotts monopolization and essential facilities tying and other vertical restraints and merger policy The writing is clear accessible but still technically sophisticated and comprehensive This book represents the best in contemporary antitrust scholarship by authors who understand and are able to communicate the centrality of economic analysis to antitrust No antitrust lawyer serious antitrust student or antitrust economist should be without this book Herbert Hovenkamp University of Iowa College of Law US This comprehensive book provides an extensive overview of the major topics of antitrust law from an economic perspective Its in depth treatment and analysis of both the law and economics of antitrust is presented via a collection of interconnected original essays The contributing authors are among the most influential scholars in antitrust with a rich diversity of backgrounds Their entries cover amongst other issues predatory pricing essential facilities tying vertical restraints enforcement mergers market power monopolization standards and facilitating practices This well organized and substantial work will be invaluable to professors of American antitrust law and European competition law as well as students specializing in competition law It will also be an important reference for professors and graduate students of economics and business **Handbook of Health Economics** A J. Culyer, J.P. Newhouse, 2000-07-19 The Handbook of Health Economics provide an up to date survey of the burgeoning literature in health economics As a relatively recent subdiscipline of economics health economics has been remarkably successful It has made or stimulated numerous contributions to various areas of the main discipline the theory of human capital the economics of insurance principal agent theory asymmetric information econometrics the theory of incomplete markets and the

foundations of welfare economics among others Perhaps it has had an even greater effect outside the field of economics introducing terms such as opportunity cost elasticity the margin and the production function into medical parlance Indeed health economists are likely to be as heavily cited in the clinical as in the economics literature Partly because of the large share of public resources that health care commands in almost every developed country health policy is often a contentious and visible issue elections have sometimes turned on issues of health policy Showing the versatility of economic theory health economics and health economists have usually been part of policy debates despite the vast differences in medical care institutions across countries The publication of the first Handbook of Health Economics marks another step in the evolution of health economics

Political Economics Torsten Persson, Guido Tabellini, 2002-01-25 What determines the size and form of redistributive programs the extent and type of public goods provision the burden of taxation across alternative tax bases the size of government deficits and the stance of monetary policy during the course of business and electoral cycles A large and rapidly growing literature in political economics attempts to answer these questions But so far there is little consensus on the answers and disagreement on the appropriate mode of analysis Combining the best of three separate traditions the theory of macroeconomic policy public choice and rational choice in political science Torsten Persson and Guido Tabellini suggest a unified approach to the field As in modern macroeconomics individual citizens behave rationally their preferences over economic outcomes inducing preferences over policy As in public choice the delegation of policy decisions to elected representatives may give rise to agency problems between voters and politicians And as in rational choice political institutions shape the procedures for setting policy and electing politicians The authors outline a common method of analysis establish several new results and identify the main outstanding problems

Forthcoming Books Rose Arny,2002 **Redefining the Market-State Relationship** Ioannis Glinavos,2013-10-01 This book offers an interdisciplinary overview of the role of law in modern capitalism in the context of financial crisis In this work the reader will find a discussion of key issues relevant to the crisis that have occupied the pages of the financial press since 2007 including an assessment of the meltdown of the sub prime mortgage market the credit crunch the European debt crisis and the turmoil in Greece plus a series of theoretical contributions that are aimed to challenge perceptions of the market state relationship and the place of law within it The book includes a methodological defence of the state market dichotomy a critique of the tenets of neoclassical economics and an evaluation of what the financial crisis heralds for the future of the political economy of western democracies Ioannis Glinavos argues that it is a mistake to associate markets with freedom and states with oppression and suggests that more choice for consumers can and does mean less choice for citizens The book suggests that a new social contract is needed to ensure the survival of both capitalism and democracy In contributing a unique legal perspective to the underlying dynamics of the financial crisis this book will be valuable to scholars and students of regulation financial markets and economic development The British National Bibliography Arthur James Wells,2009
