Oeuvres complètes de Voltaire: Correspondance générale Voltaire,1838 *Le Guide Musical ,1874* **Oeuvres complètes de Voltaire** Voltaire,1869 **Rapport d'enquête sur les tarifs de l'électricité** Clotilde Valter,commission d'enquête ,2015-03-05 A la demande de la Commission des affaires économiques de l'Assemblée nationale une commission d'enquête sur les tarifs de l'électricité a été créée en octobre 2014. Cette initiative est intervenue suite aux débats nés à la fois de la hausse continue de la facture des usagers de l'ordre de 30 % depuis 2007 de la bataille juridique qui se joue désormais systématiquement à l'occasion de la fixation par arrêté interministériel des tarifs réglementés de vente. La première partie du rapport pose un diagnostic en décrivant un dispositif en bout de course. Non seulement les tarifs réglementent des vocations multiples couvrant les coûts des fournisseurs assurer la proportionnalité pour servir le pouvoir d'achat des ménages, favoriser la compétitivité des entreprises pour parer la transition énergétique ou dégager des ressources fiscales pour les collectivités locales, mais la situation a ceci de baroque que la fin du monopole n'a pas ouvert la voie une véritable concurrence celle-ci ayant plutôt eu pour effet en France d'accroître les coûts. L'opérateur historique est aujourd'hui au pied du mur après avoir connu l'effacement du monopole. Il importe donc de préparer EDF aux enjeux de l'avenir. Outre la complexité de sa situation financière, ses relations avec l'état qui est la fois tutelle régulateur et actionnaire sont incohérentes. Le cadre juridique européen est par ailleurs unanimement contesté car il ne semble plus répondre aux enjeux du moment. Enfin, les défis de la transition énergétique nous imposent de nous orienter vers sinon une baisse du moins une maîtrise de la consommation énergétique ce qui implique d'intégrer les nouveaux moyens de production notamment l'autoconsommation et la production décentralisée. Pour relever les défis à venir, trois grandes pistes de travail sont proposées. La première est de donner EDF les moyens d'affronter les défis du futur en clarifiant ses relations avec l'état en réduisant ses coûts pour dégager des marges de manœuvre financières et en lui permettant de jouer un rôle de leader non seulement dans le secteur nucléaire mais également dans celui des énergies renouvelables. EDF doit accroître la part de ses investissements consacrés aux énergies renouvelables. Deuxième piste : la France doit porter une vision intégrée de l'électricité. Il faut rompre avec une politique européenne centrée autour de la seule concurrence qui n'intègre pas les autres aspects de politique publique tels que le climat ou la compétitivité des industries électro-intensives. La troisième piste consiste à revoir la structure des tarifs de l'électricité. Il convient tout d'abord de faire voler les tarifs sans modifier les fondamentaux, tel est l'objet de la réforme de la CSPE et pour ce faire de distinguer ce qui relève de l'usager et ce qui relève des politiques publiques de solidarité. C'est le chantier des mois à venir. Il convient également d'intégrer dans les tarifs les évolutions importantes du monde de l'énergie. Le monde a changé depuis quarante ans avec notamment l'introduction de la concurrence et l'apparition des énergies nouvelles d'une production décentralisée et d'autoproduction. Le

bouleversement de l ensemble des param tres n est pas sans poser notamment la question du forfait ou celle des risques li s d ventuelles vasions de tarifs La d centralisation de la production peut galement redynamiser la concurrence *Oeuvres completes de Voltaire, avec des notes et une notice historique sur la vie de Voltaire* Voltaire,1838 *Journal de Paris*,1788
