

COMMUNITY-BASED PARTICIPATORY RESEARCH

Addresses an issue, concern or topic raised by the community

Community (co)-led, designed, conducted, disseminated

ACTION

Is aimed at change

Creation or production of knowledge based on systematic study

For example:

- (health) Why are there high rates of cancer?
- (education) Why do children drop out of school?
- (social) How can we address housing needs?
- (economic development) Should we develop a wind farm?
- (environmental) How can we make our neighborhood safer?
- (culture) What will happen to our knowledge of the water if it is polluted?
-?

For example:

- The project is headquartered in the community
- Community members decide what kinds of methods work best
- Community members carry out the research
- Community members are co-authors on articles
- reports are shared with community before other scholars

For example:

- (hypothesis-driven) women who do not have a regular primary care provider are more likely to develop cervical cancer
- (grounded-theory) Interviews with women discovered that experience with sexual abuse prevented them from seeking gynecological care

For example:

- (structural) change power relations or institutions of society
- (behavioral) change lifestyle choices

Participatory Action Research Qualitative Research Methods:

Participatory Action Research Alice McIntyre, 2008 Participatory Action Research PAR introduces a method that is ideal for researchers who are committed to co developing research programs with people rather than for people The book provides a history of this technique its various strands and the underlying tenets that guide most projects It then draws on two PAR projects that highlight three integral dimensions the meaning of participation the way action manifests itself and the strategies for gathering analyzing and disseminating information Author Alice McIntyre describes the various ways in which PAR is carried out depending on for example the issue under investigation the site of the project the project participants people s access to resources and other related issues Intended Audience This resource is an ideal supplement for graduate courses PAR qualitative research and various types of action based research

Participatory Action Research William Foote Whyte, 1991 Overall this volume should be valuable for readers demonstrates the practical and theoretical advantages of incorporating participatory action research in the social science tool kit Agricultural Systems I recommend this book for researchers and I also suggest that it be considered seriously by persons grappling with philosophy of social issues Journal of Marketing Research We have a book that deals with a potential revolution in the way organization science is done The last third of the book dealing with PAR in agriculture is of great value This is a formidable challenge for any of us to take on but many useful and practical tips are scattered throughout the book in chapters appropriately written by academics managers a union leader and government administrators Thus the message of PAR is embodied in the structure of the book It is a message we should heed Journal of Management Provides a rich set of insights into the intricacies and challenges encountered in research in applied settings with an agenda toward action International Journal of Nursing Studies Participatory Action Research PAR is a powerful research tool that unites the work of researcher and client to improve both the topic researched and the research findings themselves Yet despite the fact that various forms of PAR have been practiced for decades no single resource existed that detailed this practical research method Now in Participatory Action Research a distinguished team of contributors takes you step by step through this research technique from the initial design of a project through data gathering and analysis to final conclusions and actions arising out of the research Contributors thoroughly outline the theory and methods behind PAR weigh its strengths and weaknesses then present a series of case studies taken both from organizational and agricultural settings Organizational researchers and consultants managers sociologists or anyone engaged in qualitative or applied research will find Participatory Action Research an invaluable tool

Participatory Action Research Caroline Lenette, 2022 Participatory Action Research PAR privileges the involvement of participants as co researchers to generate new knowledge and act on findings to effect social change In PAR projects academic researchers collaborate closely with co researchers working from the idea that these individuals especially those who are usually marginalized from institutions can be engaged in meaningful research activities to achieve social justice outcomes in addition to answering research questions When deployed ethically in collaboration with co researchers PAR's participatory element facilitates a bottom up approach where knowledge is co created through grassroots or community based activities This book goes beyond a PAR how to manual on the methodology Rather it synthesizes key learnings in contemporary research with a distinct focus on the challenging aspects of undertaking PAR in practice and strategies to address these It provides a clear and user friendly collection of practical and contextual examples and presents key pointers on the implications of PAR methods their strengths and weaknesses and strategies for the field These examples will be useful for critical class

discussions as well as to anticipate fieldwork pitfalls and pre-empt challenges through collaborative approaches
