Mattaini,2013-10-01 History indicates that there are powerful routes to liberation from oppression that do not involve violence Mohandas Gandhi called for a science of nonviolent action one based on satyagraha or the insistence on truth As Gandhi understood nonviolent resistance is not passive nor is it weak rather such action is an exercise of power Despite the success of Gandhi s Quit India movement the resources dedicated to the application of rigorous science to nonviolent struggle have been vanishingly small By contrast almost unimaginable levels of financial and human resources have been devoted to the science and technologies of killing war and collective violence Mark Mattaini reviews the history and theory of nonviolent struggles against oppression and discusses recent research that indicates the substantial need for and advantage of nonviolent alternatives He then offers a detailed exploration of principles of behavioral systems science that appear to underlie effective strategic civil resistance and people power Strategic Nonviolent Power proposes that the route to what Gandhi described as the undreamt of and seemingly impossible discoveries of nonviolent resistance is the application of rigorous science Although not a simple science Mattaini s application of ecological science grounded in the science of behaviour brings exceptional power to the struggle for justice and liberation At a time when civil resistance is actively reshaping global political realities the science of nonviolent struggle deserves the attention of the scientific activist strategic military spiritual and diplomatic communities as well as the informed public      **Leadership and Cultural Change** Ramona Houmanfar,Mark Mattaini,2018-10-16 Contemporary confluences of leadership decision making and citizenship behavior often unintentionally contribute to the depletion of the

world's resources escalating health education and social crises as well as community societal and cultural struggles to adapt to emerging global shifts. Leadership and management practices in this context affect the wellbeing of organizational members e.g. their safety, health, financial security etc. but also entail positive or negative impacts on consumer practices and collective community wellbeing e.g. education, obesity, cancer, safe or green driving, energy conservation, diversity based health care etc. Decision making in most businesses and organizations is largely responsive to demands for short term profit or cost minimization. On the consumer side both cultural values and the corporate marketing practices that sustain them encourage high levels of consumption necessary to sustain corporate practices. In exploring the emerging applications of behavior science to these challenges this book showcases emerging work by internationally recognized scholars on leadership and cultural change. The book will aid organizations and leaders in creating new models of stewardship and will open opportunities for innovation while adapting and responding to growing social upheaval, technological advances and environmental concerns as well as crises in the global economy, health education and environment. This book was originally published as a special issue of the Journal of Organizational Behavior Management.
