Architecture in Use D. J. M. van der Voordt, Herman B. R. Wegen, 2005 This unique book discusses programming design and building evaluation providing a joined up approach to building design By linking the functional and architectonic qualities of a building the authors show the practical implications of the utility value of buildings Starting by looking at how the relationship between form and function has been dealt with by different approaches to architecture from a historical perspective it goes on to discuss how the desired functional quality and utility value of a building can be expressed in a brief and given a physical form by the architect Finally it advises on how to carry out post occupancy evaluation and provides the architect with methods and techniques for testing whether the intended utility value of a building has been achieved

City Imaging: Regeneration, Renewal and Decay Tara Brabazon, 2013-09-26 This book examines the paradoxes challenges potential and problems of urban living It understands cities as they are rather than as they may be marketed or branded All cities have much in common yet the differences are important They form the basis of both imaginative policy development and productive experiences of urban life The phrase city imaging is often used in public discourse but rarely defined It refers to the ways that particular cities are branded and marketed It is based on the assumption that urban representations can be transformed to develop tourism and attract businesses and in demand workers to one city in preference to another However such a strategy is imprecise History subjectivity bias and prejudice are difficult to temper to the needs of either economic development or social justice The taste smell sounds and architecture of a place all combine to construct the image of a city For researchers policy makers activists and citizens the challenge is to use or transform this image The objective of this book is to help the reader define understand and apply this process After a war on terror a credit crunch and a recession cities still do matter Even as the de territorialization of the worldwide web enables the free flow of money music and ideas across national borders cities remain important City Imaging Regeneration Renewal

Decay surveys the iconography of urbanity and explores what happens when branding is emphasized over living
