

B) Idle speed adjustment

Turn the idle speed screw clockwise until it contacts the throttle slide then continue turning two (2) additional turns. This will provide a preliminary idle speed setting. Start the engine and allow it to warm then adjust the idle speed by turning the idle speed screw clockwise or counterclockwise.

Idle speed: - Elan: 1300-1500 R.P.M.
- Alpine: 1800-2000 R.P.M.

▼ **CAUTION:** Do not attempt to set the idle speed by using the air screw. Severe engine damage can occur. If idle speed is unattainable contact your authorized dealer.

Front hood louvers (Alpine only)

When operating the vehicle in powder snow it is advisable to block the front hood louvers as per illustration using snow deflectors supplied with vehicle. Unblock the louvers as soon as snow condition becomes firmer or as soon as engine becomes too hot.

Air silencer box (Alpine only)

▼ **CAUTION:** Never operate your snowmobile with the air silencer tube disconnected. Serious engine damage will occur if this notice is disregarded.

When operating the vehicle in temperature exceeding -10°C (14°F), the rubber plug must block the engine side orifice and the rubber vent must be positioned on the side of the silencer box to allow cold air circulation.

In temperatures below -10°C (14°F) and/or powder snow, the rubber plug must block the entry of fresh air on the side of the silencer box and the rubber vent must allow the warm air being emitted from the engine to be directed over the carburetor.

▼ **CAUTION:** Observe temperature changes and locate plugs accordingly.
