Ostrow,Georgiy A. Satarov,Irina M. Khakamada,2007-10-30 The still

prevailing notion among Western powers including the United States is that Russia is a democracy or at least that it remains in the process of democratization Nothing could be further from the truth as Ostrow Satarov and Khakamada demonstrate in *The Consolidation of Dictatorship in Russia* Journalists critical of Vladimir Putin s dictatorship such as Anna Politkovskaya are murdered Nearly 100 investigative journalists an average of two per month have been murdered since Putin took power and not one person has been charged or convicted of those crimes In this book the authors seek to explain not just how Russia has become a dictatorship but why Russia s leaders made the choices that undermined democratic political development something no book has done until now The still prevailing notion among Western powers including the United States is that Russia is a democracy or at least that it remains in the process of democratization Nothing could be further from the truth as Ostrow Satarov and Khakamada demonstrate in *The Consolidation of Dictatorship in Russia* Journalists critical of Vladimir Putin s dictatorship such as Anna Politkovskaya are murdered Nearly 100 investigative journalists an average of two per month have been murdered since Putin took power and not one person has been charged or convicted of those crimes Others critical of or in opposition to Putin often meet the same fate as in the suspicious poisoning in London of Aleksandr Litvinenko How did Russia manage to transition from dictatorship to dictatorship when the hopes for democracy were so great and when Western conventional wisdom assumed for so long that democracy was inevitable there *The Consolidation of Dictatorship in Russia* answers that question Georgiy A Satarov was President Boris Yeltsin s chief political counselor for much of the 1990s and in that capacity was inside the Kremlin and present when most of the decisions this book details were made Irina M Khakamada was a Deputy in the Russian State Duma a Deputy Speaker in the parliament held a cabinet level position in the government and most recently was Putin s main liberal opponent in the 2004 presidential election These individuals are among Russia s most prominent democratic activists and were participants in the events that led Russia away from the path of democratization They share a unique perspective and knowledge of what happened and why The authors seek to explain not just what Russia did and the consequences of those decisions but why Russia s leaders made the choices that undermined democratic political development something no book has done until now *Book Review Index - 2009 Cumulation* Dana Ferguson,2009-08 *Book Review Index* provides quick access to reviews of books periodicals books on tape and electronic media representing a wide range of popular academic and professional interests The up to date coverage wide scope and inclusion of citations for both newly published and older materials make *Book Review Index* an exceptionally useful reference tool More than 600 publications are indexed including journals and national general interest publications and newspapers *Book Review Index* is available in a three issue subscription covering the current year or as an annual cumulation covering the past year **The Surrounds** AbdouMaliq Simone,2022-03-07 In *The Surrounds* renowned urbanist AbdouMaliq Simone offers a new theorization of the interface of the urban and the political Working at the intersection of Black studies urban theory and decolonial and Islamic thought Simone centers the surrounds those urban spaces beyond

control and capture that exist as a locus of rebellion and invention He shows that even in clearly defined city environments whether industrial carceral administrative or domestic residents use spaces for purposes they were not designed for schools become housing markets turn into classrooms tax offices transform into repair shops The surrounds Simone contends are where nothing fits according to design They are where forgotten and marginalized populations invent new relations and ways of living and being continuously reshaping what individuals and collectives can do Focusing less on what new worlds may come to be and more on what people are creating now Simone shows how the surrounds are an integral part of the expansiveness of urban imagination     Smith's Anesthesia for Infants and Children E-Book Peter J. argues that this invitation to discipleship is a call for believers to reassess their relationship with material possessions and their desire for wealth and power Like Jesus believers are to travel light on the way for holding on strongly to possessions can be a hindrance for the journey To embrace those in society who are least vulnerable and destitute is to embrace Jesus himself and the God who sent him Traveling light on the way requires believers to place their trust in God to depend on God to provide their needs Moses shows that the journey is by its very nature a rejection of the status quo it demands followers of Jesus to shun greed and the amassing of superfluous possessions that the world encourages The book demonstrates that to be on this journey is to commit to the creation of communities of care where those like Jesus poor vulnerable and marginalized are welcomed and cared for

also highlights how separate documentation systems have developed managed by distinct increasingly professionalised staff impacting our ability to understand and use what we find in museums and their ever expanding online collections Exploring this legacy allows us to rethink current practice focusing less on individual objects and more on the rich stories and interconnected resources that lie at the heart of the contemporary plural participatory relational museum Artefacts Archives and Documentation in the Relational Museum is essential reading for those who wish to better understand the institutional silos found in museums and the changes required to make museum knowledge more accessible The book is a particularly important addition to the fields of museum studies archival science information management and the history of cultural heritage technologies

heritage memory and colonialism Every Monument Will Fall joins the dots between the building of statues the founding of academic disciplines like archaeology and anthropology and the warehousing of stolen art and human skulls in museums including the one in which he is a curator Part history part biography part excavation the story runs from the Yorkshire wolds to the Crimean War from southern Ireland to the frontline of the American Civil War from the City of London to the University of Oxford revealing enduring legacies of militarism slavery racism and white supremacy hardwired into the heart of our cultural institutions Every Monument Will Fall offers an urgent reappraisal of how we think about culture and how to find hope remembrance and reconciliation in the fragments of an unfinished violent past Refusing to choose between pulling down every statue or living in a past that we can never change the book makes the case for allowing monuments to fall once in a while even those that are hard to see as monuments rebuilding a memory culture that is in step with our times Model Perspectives: Structure, Architecture and Culture Mark R. Cruvellier, Bjorn N. Sandaker, Luben Dimcheff, 2017-09-25 This book contains a unique collection of various perspectives on the relationship between structures and the forms and spaces of architecture As such it provides students and professionals alike with an essential sourcebook that can be mined for visual inspiration as well as for textually rich and authoritative insight into the links between structure architecture and cultural context The chapters address fundamental structural elements and systems columns walls beams trusses frames tensile structures arches domes and shells Each chapter is subdivided into two parts The essays introduce the chapters with the reprinting of a curated set of essays and excerpts by various authors that uniquely address how particular structural elements or systems relate in essential fashion to architectural design concepts The model studies physical models of the overall structural systems of several notable contemporary buildings from Europe North and South America Africa and Asia are illustrated with large photographs detail close ups and views of their external forms and internal spaces that establish the exceptional qualities of these projects in connecting structural form to architectural design objectives Mosaic layouts complete the chapters with a collection of photographs of yet more models whose particular details and unique features serve to extend the visual repertoire of the structural type being considered The combination juxtaposition and mutual positive reinforcement of these two collections one largely textual and the other image based provides the reader with unique and multifaceted insights into how structural forms and systems can be related to architectural design intentions Conveyed by a strong and deliberate graphical design format this assembly of materials gets to the very essence of structures within the context of architecture and will inspire students and practitioners alike to make strategic design decisions for their own projects **Italian American Poetics of Place** Sabrina Vellucci, 2024-11-19 This volume examines the significance of place in contemporary Italian American literature from an ecocritical perspective It fills a gap in the theoretical discourse on Italian American culture whose concerns about environmental justice have been mostly overlooked From mid twentieth century poets such as John Ciardi and Diane di Prima to late twentieth and twenty first century fiction writers such as Carole

Maso and Salvatore Scibona the study combines Italian American literary criticism with the spatial turn that over the last decades has asserted the interpretive significance of place and the environment in literary texts Questioning the prejudice that sees Italian American culture as detached from ecological issues these works show that such diasporic heritage has helped forge different modes of relationship and new forms of expression in contact with the American land Their relevance lies not so much in defining or redefining Italian American ethnicity but in forging ideas and futures beyond their immediate framework and subject matter By focusing on the intersection of gender and ethnicity with local and transnational spaces and aesthetic practices Italian American Poetics of Place contributes to the growing field of inquiry that explores the resources of the literary in laying the basis for more dialogic and inclusive forms of awareness and community with both the human and other than human
