McNulty, Michael Touchton, 2021 Participatory Budgeting continues to spread across the globe as government officials and citizens adopt this innovative democratic program in the hopes of strengthening accountability civil society and well being Governments often adapt PB s basic program design to meet local needs thus creating wide variation in how PB programs function Some programs retain features of radical democracy others focus on community mobilization and yet other programs seek to promote participatory development Participatory Budgeting in Global Perspective provides a theoretical and empirical explanation to account for widespread variation in PB s adoption adaptation and impacts This book develops six PB types to account for the wide variation in how PB programs function as well as the outcomes they produce To illustrate the similar patterns across the globe four empirical chapters present a rich set of case studies that illuminate the wide differences among these programs chapters are organized regionally with chapters on Latin America Asia Sub Saharan Africa Europe and North America By organizing the chapters regionally it becomes clear that there are temporal spatial economic and organizational factors that produce different programs across regions but similar programs within each region A key empirical finding is that the change in PB rules and design is now leading to significant differences in the outcomes these programs produce We find that some programs successfully promote accountability expand civil society and improve well being but too often researchers do not have any evidence tying PB to significant social or political change The 'New Normal' in Planning, Governance and Participation Enza Lissandrello, Janni Sørensen, Kristian Olesen, Rasmus Nedergård Steffansen, 2023-07-17 This book offers a unique and timely contribution informed by responses to the COVID 19 pandemic to unpack the intertwined challenges that planning needs to cope with in the future It argues that the pandemic and post pandemic periods in their successive waves of restrictions and social distancing have disrupted normal practices but have also contributed to shaping a new normal The new normal is emerging re configuring and prioritizing the substantive objects of planning and its governance and participatory processes This book discusses this shift and presents a collection of

International Trends in Participatory Budgeting Michiel S. De Vries, Juraj Nemec, David Špaček, 2021-11-26 This book analyses the participatory budgeting practice as it has evolved in evaluated countries focusing on what is substantially at stake concerning the budget

and issues involved the actual participation the way such processes are organised and administered and the outcomes of such processes It concludes that participatory budgeting in selected European countries is far away from the level of best practice but that all experiences are not just trivial pursuits The information collected serves to check to what extent participatory budgeting as practiced in the countries involved presents a real attempt to change municipal budgets towards addressing the needs of marginalized groups and to improve decision making based on local democracy and participation or whether these processes as such are to be judged to be more important than any output and outcomes The practices can neither be seen as a process of policy diffusion nor as a process of policy mimesis The terminology of participatory budgeting remains but the tools to achieve the goals resulted only in marginal changes in the status quo in municipalities in European countries practicing participatory budgeting instead of resulting in radical changes to increase spending in favor of marginalized groups Chapter 15 Unraveled Practices of Participatory Budgeting in European Democracies is available open access under a CC BY 4.0 license

institutions is emerging and developing through new modes of participatory governance. One of the most interesting political developments of the past decade has been the adoption by social movements of strategies seeking to change political institutions through participatory governance. These strategies have flourished in a variety of contexts from anti-austerity and pro-social justice protests in Spain to movements demanding climate transition and race equality in the UK and the USA to constitutional reforms in Belgium and Iceland. The chief ambition and challenge of these new forms of participatory governance is to institutionalise the prefigurative politics and social justice values that inspired them in the first place by mobilising the bureaucracy to respond to their claims for reforms and rights. The authors of this volume assess how participatory governance is being transformed and explore the impact of such changes, providing timely critical reflections on the constraints imposed by cultural, economic and political power relations on these new empowered participatory spaces, the potential of this new wave of participatory democracy to reimagine the relationship between citizens and traditional institutions towards more radical democratic renewal, where and how these new democratisation efforts sit within the representative state and how tensions between the different demands of lay citizens, organised civil society and public officials are being managed. This book will be an important resource for students and academics in political science, public administration and social policy, as well as activists, practitioners and policymakers interested in supporting innovative engagement for deeper social transformation.

*Participatory Spaces Under Urban Capitalism* Markus Holdo, 2023-09-22. Can people use new participatory spaces to reclaim their rights as citizens and challenge structures of political power? This book carefully examines the constraints and possibilities for participatory governance under capitalism. To understand what is at stake in the politics of participation, we need to look beyond the values commonly associated with it. Citizens face a dilemma: should they participate even if this helps to sustain an unjust system, or not participate, thereby turning down rare opportunities to make a difference? By examining the rationale behind democratic innovation and the reasons people have for getting involved, this book provides a theory of how citizens can use new democratic spaces to challenge political boundaries. Connecting numerous international case studies and presenting original research from Rosario, Argentina, this book offers a crucial corrective to previous research. What matters most is not the design of new models of participation, nor is it the supposed radical imagination of political leaders. It is whether people use new spaces for participation to renegotiate what democracy means in practice. Bridging critical urban studies and democratic theory, this book will be of interest to researchers and students in the fields of democratic innovations, political economy and urban planning. It will also provide activists and

practitioners of participatory democracy with important tools to expand spaces of grassroots democracy The Open Access version of this book available at <http://www.taylorfrancis.com> has been made available under a CC BY Creative Commons Attribution CC BY 4.0 International license
