After a full review of the patient's chart:

1. History Components

- Patient Interview: to collect information first-hand from the patient about the nature and course of impairment. This information pertains to the specific body functions and structures that are impaired. Patient-perceptions on functional limitations and perceived disabilities are also included. This information pertains to the activities the patient is involved in and the participation limitations experienced as a result of the patient's impairments. In addition, personal factors are emphasized to determine the emotional impact of the current impairment.
- Partner Interview: to collect information on partner perceptions related to the patient's impairment and how the impairment impacts daily life. This information pertains to the specific body functions and structures that are impaired in addition to their functional impact on activities and participation. Information on family resources is also included. Knowing and incorporating the strengths and social circles of the family will promote successful intervention.

2. Physical Examination

- Oral Mechanism Examination: to assess each component of the speech system separately and to define and classify notable changes by cranial nerves (V, VII, IX, X, XII). The face, lips, jaw, tongue, and palate are all assessed for the following: strength, speech, range of motion, tone, and coordination. Pertinent questions related to patient history are included throughout to supplement the physical examination findings. A test for apraxia of speech is included, but should only be used if groping is present during the evaluation.

3. Motor Speech Evaluation

- Oral Mechanism Examination: an overview of RPRAP components are also included within the oral mechanism examination to screen for changes in respiration, phonation, resonance, articulation, and prosody. This includes the
