J. N. Limebeer, Matteo Massaro, 2018-08-23 *Dynamics and Optimal Control of Road Vehicles* uniquely offers a unified treatment of tyre car and motorcycle dynamics and the application of nonlinear optimal control to vehicle related problems within a single book This is

a comprehensive and accessible text that emphasises the theoretical aspects of vehicular modelling and control The book focuses on two major elements The first is classical mechanics and its use in building vehicle and tyre dynamics models The second focus is nonlinear optimal control which is used to solve a range of minimum time and minimum fuel as well as track curvature reconstruction problems As is known classically all of this material is bound together by the calculus of variations and stationary principles The treatment of this material is supplemented with a number of examples that were designed to highlight obscurities and subtleties in the theory

**Mobilising Design** Justin Spinney, Suzanne Reimer, Philip Pinch, 2017-02-24 This book brings together research working at the boundary between design knowledges and mobilities offering a novel collection for both theorists and practitioners Drawing upon detailed case studies it demonstrates the diverse roles of design in shaping mobility at different spaces and scales across cities within different types of buildings and infrastructures and through commuting work and leisure activities A range of international scholars illustrate the designed mobilities of car parks traffic lights street benches pedestrian wayfinding systems and accessible design in the urban environment they examine spaces within hospitals airports and train stations and investigate design practices for bicycles future urban vehicles and MotoGP motorcycle racing Other contributions explore overlooked mobile artefacts such as television and video game remote controls 3D printing and the types of packaging which enable objects themselves to move around This book demonstrates how the tools assumptions and processes of design shape spaces of mobility and also illuminates how shifts in the fluidity and circulation of people practices and materials in turn reconfigure practices of design Mobilising Design develops multi disciplinary understandings of design drawing upon diverse literatures including design history product design architecture and cultural geography By highlighting often invisible artefacts and associated knowledges and controversies the book foregrounds the taken for granted ways in which everyday mobility is designed It will be of interest to scholars in geography sociology economic history architecture design and urban theory
