

Fill in the blanks with the correct word.

15. Motion is measured relative to a reference point

16. The velocity of an object involves both its speed and direction

17. If two lines appear on the same motion graph, the line with the steeper slope indicates a greater speed.

18. The motion of a car stopping at a traffic light is an example of a(n) negative acceleration, also called deceleration.

19. Speed that does not change is referred to as constant speed.

20. A horizontal line on a distance-versus-time graph means no motion

Select one of the underlined words to make the statement true.

If the statement is true write true. If it is false change the underlined word or words to make the statement true.

21. An object cannot be accelerating if it has a constant speed. False

22. The information needed for describing speed is distance, time and direction

Distance + Time

23. If you know the speed of an object, you also know the direction of movement.

Velocity
