The Transnational Redress Movement for the Victims of Japanese Military Sexual Slavery Pyong Gap Min,Thomas Chung,Sejung Sage Yim,2020-02-10 This book examines the redress movement for the victims of Japanese military sexual slavery in South Korea Japan and the U S comprehensively The Japanese military forcefully mobilized about 80 000 200 000 Asian women to Japanese military brothels and forced them into sexual slavery during the Asian Pacific War 1932 1945 Korean comfort women are believed to have been the largest group because of Korea s colonial status The redress movement for the victims started in South Korea in the late 1980s The emergence of Korean comfort women to society to tell the truth beginning in 1991 and the discovery of Japanese historical documents proving the responsibility of the Japanese military for establishing and operating military brothels by a Japanese historian in 1992 accelerated the redress movement for the victims The movement has received strong support from UN human rights bodies the U S and other Western countries It has also greatly contributed to raising people s consciousness of sexual violence against women at war However the Japanese government has not made a sincere apology and compensation to the victims to bring justice to the victims

The Patchwork of World History in Texas High Schools Stephen Jackson,2022-11-30 This book traces the historical

development of the World History course as it has been taught in high school classrooms in Texas a populous and nationally influential state over the last hundred years Arguing that the course is a result of a patchwork of competing groups and ideas that have intersected over the past century with each new framework patched over but never completely erased or replaced the author crucially examines themes of imperialism Eurocentrism and nationalism in both textbooks and the curriculum more broadly The first part of the book presents an overview of the World History course supported by numerical analysis of textbook content and public documents while the second focuses on the depiction of non Western peoples and persistent narratives of Eurocentrism and nationalism It ultimately offers that a more global accurate and balanced curriculum is possible despite the tension between the ideas of professional world historians who often de center the nation state in their quest for a truly global approach to the subject and the historical core rationale of state sponsored education in the United States to produce loyal citizens Offering a new conceptual understanding of how colonial themes in World History curriculum have been dealt with in the past and are now engaged with in contemporary times it provides essential context for scholars and educators with interests in the history of education curriculum studies and the teaching of World History in the United States

World History Roger B. Beck,Linda Black,Larry S. Krieger,2002-02-28 **Modern World History** Roger B. Beck,2009 **The New Politics of the Textbook** Heather Hickman,Brad J. Porfilio,2012-10-13 In an age of unprecedented corporate and political control over life inside of educational institutions this book provides a needed intervention to investigate how the economic and political elite use traditional artifacts in K 16 schools to perpetuate their interests at the expense of minoritized social groups The contributors provide a comprehensive examination of how textbooks the most dominant cultural force in which corporations and political leaders impact the schooling curricula shape students thoughts and behavior perpetuate power in dominant groups and trivialize social groups who are oppressed on the structural axes of race class gender sexuality and dis ability Several contributors also generate critical insight in how power shapes the production of textbooks and evaluate whether textbooks still perpetuate dominant Western narratives that normalize and privilege patriotism militarism consumerism White supremacy heterosexism rugged individualism technology and a positivistic conception of the world Finally the book highlights several textbooks that challenge readers to rethink their stereotypical views of the Other to reflect upon the constitutive forces causing oppression in schools and in the wider society and to reflect upon how to challenge corporate and political dominance over knowledge production

Teaching Global History Alan J. Singer,2012-04-27 Teaching Global History challenges prospective and beginning social studies teachers to formulate their own views about what is important to know in global history and why It explains how to organize the curriculum around broad social studies concepts and themes and student questions about humanity history and the contemporary world All chapters include lesson ideas a sample lesson plan with activity sheets primary source documents and helpful charts graphs photographs and maps High school students responses are woven in throughout Additional

material corresponding to each chapter is posted online at http://people.hofstra.edu/alan_j_singer The traditional curriculum tends to highlight the Western heritage and to race through epochs and regions leaving little time for an in depth exploration of concepts and historical themes for the evaluation of primary and secondary sources and for students to draw their own historical conclusions Offering an alternative to such pre packaged textbook outlines and materials this text is a powerful resource for promoting thoughtful reflection and debate about what the global history curriculum should be and how to teach it

Globalization and Global History Barry K. Gills, William Thompson, 2012-11-12 Globalization and Global History argues that globalization is not an exotic and new phenomenon Instead it emphasizes that globalization is something that has been with us as long as there have been people who are both interdependent and aware of that fact Studying globalization from the vantage point of long term global history permits theoretical and empirical investigation allowing the authors collected to assess the extent of ongoing transformations and to compare them to earlier iterations With this historical advantage the extent of ongoing changes which previously appeared unprecedented can be contrasted to similar episodes in the past The book is divided into three sections The first focuses on how globalization has been written about from a historical perspective The second part advances three different takes on how best to view globalization from a very long term stance The final section continues this interpretative thread by examining more narrow aspects of globalization processes ranging from incorporation processes to systemic disruptions

Focus on Grammar and Meaning Luciana C. de Oliverira, Mary J. Schleppegrell, 2016-06-28 Focus on Grammar and Meaning explores how to teach grammar effectively to second or foreign language learners aged 5-18 It provides teachers with research insights that will help them to reflect on their classroom practice and enable them to experiment with different ways of teaching grammar Taking a systemic functional approach the authors emphasize the importance of linking language and meaning in teaching Key research studies on grammar instruction are featured examples from real classroom practice are examined and activities are provided to help teachers relate the content to their own teaching context Additional online resources at www.oup.com/elt/teacher/fogm Luciana C de Oliveira is Associate Professor of TESOL and Applied Linguistics at Teachers College Columbia University New York Mary J Schleppegrell is Professor of Education at the University of Michigan Ann Arbor
