## **Modern North Architecture On The Frozen Edge:**

**Modern North** Julie Decker, 2010-03-31 The Geographic Region Around the North Pole is a Raw and Exotic Area of Untouched Nature and Inescapable Beauty Building in this extremely cold climate requires an advanced degree of ingenuity and resolve Ecological conditions including high winds snowdrifts and permafrost combined with periods of little sunlight present seemingly impossible logistical hurdles for architects Vernacular buildings have emerged but like most indigenous structures they do little more than simply enclose and protect Recent years have witnessed an explosion of exceptional new architecture and a new definition of a Northern building one that is both extraordinarily responsive to place and aesthetically provocative In *Modern North Architecture on the Frozen Edge* author Julie Decker presents thirty four of the most compelling and far ranging possibilities of contemporary architecture in the North These buildings located in northern Canada Scandinavia and Alaska are united in the way they embrace extreme conditions and provide visual stimulation in places that sometimes offer little more than a whitescape The book contains innovative structures by both established and up and coming architects including David Chipperfield Architects Studio Granda and Shim Sutcliffe Architects as well as essays by Brian Carter Juhani Pallasmaa Edwin Crittenden and Lisa Rochon that place the projects in the context of a new architectural response to the North **BOOK JACKET**

**Sami Art and Aesthetics** Svein Aamold, Ulla Angkjær Jorgensen, Elin Haugdal, 2017-12-31 During the last five decades we have witnessed an increase in activity among artists identifying themselves as Sami the only recognised indigenous people of Scandinavia At the same time art and duodji traditional Sami art and craft have been organized and institutionalized not least by the Sami artists themselves *Sami Art and Aesthetics* discusses and highlights these developments and places them in historical and contemporary contexts for an international audience At stake are complex changing terms regarding the creative and the political agencies The question is not how indigeneity identity people art duodji and aesthetics correspond to conventional Western ideas rather it is how they interact with the Sami and their neighbouring cultures and societies The volume is written by some of the foremost art historians and literary scholars in Sami art craft architecture culture and indigenous studies Artists presented include Johan Turi Ivar Jaks Outi Pieski Folke Fjellstrom Katarina Pirak Sikku Geir Tore Holm and Silje Figenschou Thoresen **Adaptive Architecture**

Wolfgang F. E. Preiser, Andrea E. Hardy, Jacob J. Wilhelm, 2017-09-01 The constant in architecture's evolution is change *Adaptive Architecture* explores structures or environments that accommodate multiple functions at the same time sequentially or at periodically recurring events It demonstrates how changing technological economic ecological and social conditions have altered the playing field for architecture from the design of single purpose structures to the design of interacting systems of synergistically interdependent distributed buildings Including contributors from the US UK Japan Australia Germany and South Africa the essays are woven into a five part framework which provides a broad and unique treatment of this important and timely issue *Design and the Built Environment of the Arctic* Leena Cho, Matthew

Jul,2023-12-20 **Design and the Built Environment of the Arctic** is a concise introductory guide to the design and planning of the built environments in the Arctic region As the global forces of change are becoming more pronounced in the Arctic the future trajectories for living environments city making processes and their adaptive capacities need to be addressed directly This book presents 11 new and original contributions from both leading and emerging scholars and practitioners positioning the Arctic as a dynamic diverse and lived place at the nexus of unprecedented socioenvironmental transformations The volume offers key concepts for understanding and spatializing Arctic cities and landscapes similarities and differences in the development of design and planning approaches responsive to specific climatic and cultural conditions and historical and geographic case studies that provide unique perspectives for the management of the built environment from the scales of a building and infrastructure to cities and territories Altogether the contributions expand regional Arctic design scholarship to understand how the variability of the Arctic context influences the designed urban architecture and landscape systems and offer numerous lessons for design and other forms of spatial practice both within and beyond the Arctic This is a unique resource for researchers creative practitioners policymakers and community decision makers as well as for advanced undergraduate and graduate students

**The Cambridge History of the Polar Regions** Adrian Howkins,Peder Roberts,2023-05-11 The Cambridge History of the Polar Regions is a landmark collection drawing together the history of the Arctic and Antarctica from the earliest times to the present Structured as a series of thematic chapters an international team of scholars offer a range of perspectives from environmental history the history of science and exploration cultural history and the more traditional approaches of political social economic and imperial history The volume considers the centrality of Indigenous experience and the urgent need to build action in the present on a thorough understanding of the past Using historical research based on methods ranging from archives and print culture to archaeology and oral histories these essays provide fresh analyses of the discovery of Antarctica the disappearance of Sir John Franklin the fate of the Norse colony in Greenland the origins of the Antarctic Treaty and much more This is an invaluable resource for anyone interested in the history of our planet

**Competing Arctic Futures** Nina Wormbs,2018-08-06 This edited collection explores how narratives about the future of the Arctic have been produced historically up until the present day The contemporary deterministic and monolithic narrative is shown to be only one of several possible ways forward This book problematizes the dominant prediction that there will be increased shipping and resource extraction as the ice melts and shows how this seemingly inevitable future has consequences for the action that can be taken in the present This collection looks to historical projections about the future of the Arctic evaluating why some voices have been heard and championed while others remain marginalised It questions how these historical perspectives have shaped resource allocation and governance structures to understand the forces behind change in the Arctic region Considering the history of individuals and institutions their political and economic networks and their perceived power the essays in this collection offer new perspectives on how

the future of the Arctic has been produced and communicated      *Modern Finland* Harald Haarmann, 2016-10-04 Providing a multifaceted view of modern Finland this book describes its history culture language geography natural history and the mythology of early peoples Topics include Fenno Scandia inhabitants and their environment traditional naturalism and modern environmentalism and the salient features of Finnishness including an analysis of the Finnish educational system and gender equality Finland's art architecture and music are highlighted along with its peace keeping missions worldwide The country's several ethnic groups and their languages are discussed the Saami Finns Finland Swedes Russian speaking peoples Jews and Gypsies The author examines Finland's late but rapid development in commerce and industry with a focus on the history of Nokia Corporation which grew from a 19th century manufacturer of pulpwood and rubber boots to a 21st century international digital communications company      **Choice** ,2009      **Non-Plan: Essays on Freedom, Participation and Change in Modern Architecture and Urbanism** Jonathan Hughes, Simon Sadler, 2013-01-11 Non Plan explores ways of involving people in the design of their environments a goal which transgresses political categories of right and left Attempts to circumvent planning bureaucracy and architectural inertia have ranged from free market enterprise zones to self build housing and from squatting to sophisticated technologies of prefabrication Yet all have shared in a desire to let people shape the built environment they want to live and work in How can buildings better reflect the needs of their inhabitants How can cities better facilitate the work and recreation of their many populaces Modernism had promised a functionalist approach to resolving the architectural needs of the twentieth century yet the design of cities and buildings often appears to confound the needs of those who use them their design and layout being highly regulated by restrictive legislation planning controls and bureaucracy Non Plan considers the theoretical and conceptual frameworks within which architecture and urbanism have sought to challenge entrenched boundaries of control focusing on the architectural history of the post war period to the present day This provocative book will be of interest to architects planners and students of architecture design town planning and architectural history Its contributors include architects critics and historians including many whose work helped shape the Non Plan debate during the period List of contributors Cedric Price Benjamin Franks Elizabeth Lebas Eleonore Kofman Ben Highmore Yona Friedman Paul Barker Clara Greed Barry Curtis Colin Ward Ian Horton John Beck Chinedu Umenyilora and Malcolm Miles      **HUD Challenge** ,1977      **HUD Challenge** United States. Department of Housing and Urban Development, 1978      *Challenge* ,1978      *Glacier-influenced Sedimentation on High-latitude Continental Margins* J. A. Dowdeswell, C. Ó Cofaigh, 2002 This book examines the process and patterns of glacier influenced sedimentation on high latitude continental margins and the geophysical and geological signatures of the resulting sediments and landforms It contains a range of papers concerning modern and glacially influenced sedimentation in high latitude areas from both hemispheres many of which discuss the relationship between glacier dynamics and the sediments and landforms preserved in the glacial marine environment      Plain Modern Malcolm Quantrill, Glenn Murcutt, Kenneth Frampton, Brian

MacKay-Lyons, 2005-07-14 It has been our distinct pleasure over the past few years to publish monographs on a select group of young architects and firms whose work represents the best of contemporary design thinking while retaining a distinctive regional sensibility. The Nova Scotian architect Brian MacKay Lyons fits neatly into this distinguished list which includes Marlon Blackwell in the Ozarks, Rick Joy in the Southwest and Miller Hull in the Northwest. Those familiar with Nova Scotia understand the austere beauty of this Canadian landscape with its wide open skies and rugged terrain pushing up against the Atlantic. MacKay Lyons's work responds to this unique topography and to the vernacular building traditions that define its communities. His houses, commercial buildings and public projects combine regional forms with local materials, technologies and building practices to create works that are linked to their environments right down to their DNA. Peaked gables, shed roofs and sliding doors are inspired by local barn types; corrugated metal cladding comes from the buildings used by the area's fishing industry; structural wooden frames are based on local ship building traditions. These elements communicate a sense of place that is sophisticated, accessible and free of sentimentality. Novelist and historian Malcolm Quantrill weaves together an intimate portrait of MacKay Lyons and his work, elucidating the peculiar regionality of his subject's architecture. A New Voices monograph published with The Graham Foundation. Urban Experience and Design Justin B. Hollander, Ann Sussman, 2020-10-15 Embracing a biological and evolutionary perspective to explain the human experience of place, *Urban Experience and Design* explores how cognitive science and biometric tools provide an evidence-based foundation for architecture and planning. Aiming to promote the creation of a healthier and happier public realm, this book describes how unconscious responses to stimuli outside our conscious awareness direct our experience of the built environment and govern human behavior in our surroundings. This collection contains 15 chapters including contributions from researchers in the US, the UK, the Netherlands, France and Iran. Addressing topics such as the impact of eye tracking analysis and seeing beauty and empathy within buildings, *Urban Experience and Design* encourages us to reframe our understanding of design, including the narrative of how modern architecture and planning came to be in the first place. This volume invites students, academics and scholars to see how cognitive science and biometric findings give us remarkable 21st century metrics for evaluating and improving designs even before they are built. *The Works of John Ruskin: Modern painters.*-v.5-6. *The stones of Venice.*-v.7. *Seven lamps of architecture. Eagle's nest* John Ruskin, 1885 *Architecture Follows Fish* Andre Tavares, 2024-10-29 A highly original exploration of the history of architecture in relation to fish, shedding light on the connection between marine environments and terrestrial landscapes, *Architecture Follows Fish* is set in the North Atlantic and its protagonist is fish. In

this book author and architect Andr Tavares explores the notion of fishing architecture a concept coined to describe architectural practices that are spawned by fisheries To encompass the scope of fishing architecture and to establish the connections between marine ecology and architectural practice the book oscillates between different continents centuries and species Fisheries are unique and this book sheds light on that uniqueness through an articulated narrative and a wealth of iconography Up until now there has been no history of architecture from the perspective of fish although there are counterparts for meat timber oil and many other industries Tavares provides a counternarrative to the traditional history of marine environments which tends to focus on water ecosystems and instead forms a bridge between what happens at sea and what happens on land The hope is that after reading this book readers will better understand life in the sea in relation to urban growth and terrestrial landscapes

**The Northern Isles** Tom Smith,Chris Jex,2007 A sea kayakers guide to the Orkney and Shetland Islands Their relative isolation stunning scenery and Norse history make Orkney and Shetland a very special place For the sea kayaker island archipelagos are particularly rewarding none more so than these Illustrated with superb colour photographs and useful maps throughout this book is a practical guide to help you select and plan trips It will provide inspiration for future voyages and a souvenir of journeys undertaken As well as providing essential information on where to start and finish distances times and tidal information the book does much to stimulate interest in the environment It is full of facts and anecdotes about local history geology scenery seabirds and sea mammals *The Modern Eclectic*

*Dictionary of the English Language* Robert Hunter,Charles Morris,1905 **The Case of the Murderous Dr. Cream** Dean Jobb,2021-07-13 A tour de force of storytelling Louise Penny 1 New York Times bestselling author of the Chief Inspector Gamache series Jobb s excellent storytelling makes the book a pleasure to read The New York Times Book Review When a doctor does go wrong he is the first of criminals Sherlock Holmes observed during one of his most baffling investigations He has nerve and he has knowledge In the span of fifteen years Dr Thomas Neill Cream murdered as many as ten people in the United States Britain and Canada a death toll with almost no precedent Poison was his weapon of choice Largely forgotten today this villain was as brazen as the notorious Jack the Ripper Structured around the doctor s London murder trial in 1892 when he was finally brought to justice The Case of the Murderous Dr Cream exposes the blind trust given to medical practitioners as well as the flawed detection methods bungled investigations corrupt officials and stifling morality of Victorian society that allowed Dr Cream to prey on vulnerable and desperate women many of whom had turned to him for medical help Dean Jobb transports readers to the late nineteenth century as Scotland Yard traces Dr Cream s life through Canada and Chicago and finally to London where new investigative tools called forensics were just coming into use even as most police departments still scoffed at using science to solve crimes But then most investigators could hardly imagine that serial killers existed the term was unknown As the Chicago Tribune wrote Dr Cream s crimes marked the emergence of a new breed of killer one who operated without motive or remorse who murdered simply for the sake of murder For fans of

Erik Larson's *The Devil in the White City* all things Sherlock Holmes or the podcast *My Favorite Murder* The Case of the Murderous Dr Cream is an unforgettable true crime story from a master of the genre
